2. ***Land Revenue.***—The decrease under total demand is the result not of a general falling off in current demand but of less arrears which remained to be collected at the beginning of the year. The only Districts in which there is a large * decrease in the current demand are Bangalore and Tumkur. The Deputy Commissioners are requested to explain the cause of the decrease.

	Rs.
Bangalore... ...	12,200
Tumkur	14,451

3. The percentage of balance on the entire demand has been as follows :—

District.	1893-94.	1894-95.	District.	1893-94.	1894-95.
Kadur ...	31·3	38·5	Kolar ...	24·8	27·8
Hassan ...	36·4	36·5	Shimoga ...	24·5	26·0
Mysore ...	38·8	36·0	Chitaldrug ...	12·1	16·6
Bangalore ...	19·1	20·1	Tumkur ...	21·8	1·6

4. The collections as given by the Deputy Commissioners differ with the Comptroller's figures to the extent noted below :—

District.	As per Deputy Commissioner's.	As per Comptroller's.	Difference.
Bangalore	18,834	18,828	— 6
Kolar	74,095	74,382	+ 287
Mysore	147,233	144,798	— 2,435
Hassan	101,544	101,357	— 187
Shimoga	200,967	201,127	+ 160

5. The attention of the Deputy Commissioners is drawn to the instructions contained in Government Proceedings No. 8263-71—R. 1210, dated 21st November 1894.

6. The balances outstanding in the Mysore, Shimoga, Kadur and Hassan Districts are very heavy. The Deputy Commissioners concerned will take early measures for collecting them.

7. *Forest.*—The Districts of Mysore, Shimoga, Kadur, Hassan and Bangalore show large balances.

8. *Mohatarfa.*—The Deputy Commissioners of Mysore and Kolar where the balances are heavy should try to show better results.

9. The remaining items call for no special remarks.

Revenue Secretary.

READ :—

Letter No. 488, dated 13th February 1895, from the Deputy Commissioner, Kadur District, to the Chief Secretary to the Government of Mysore :—

I have the honor to state that on receipt of an application from Kenchegauda, a registered holder of coffee Survey No. 147, measuring 8 acres and 20 guntas in the Hosahalli village of the Mudgere Taluk, to sub-divide the land and register the names of Mr. Hamilton for 2 acres and of Bhyregauda for 4 acres in accordance with the transfers made by him in their favor, I made a reference to the Survey Superintendent asking for his opinion as to whether the case in question may be treated under the provisions contained in Rule XXVII, para 3, of the Land Revenue Rules, or the Rules limiting the area to 5 acres in cases of lands given out for coffee cultivation made applicable. That Officer in his reply No. 24, dated 21st January 1895, preferred to make separate survey numbers to applying Land Revenue Rule XXVII.

2. The minimum area up to which applications for lands for coffee cultivation should be received is regulated by Government Proceedings No. 13450-2—R. F. 261-92, dated 31st January 1893, and that up to which absolute resignations should be tendered is also regulated by Government Proceedings No. 1945-9—R. 2065, dated 12th May 1894.

3. These provisions do not refer to the extent up to which resignations in favor of other persons should be admitted.

4. I beg to state that in my opinion the limits up to which such resignations can be made should be restricted to 2 acres, it being the minimum area up to which applications for dry lands are allowed to be received. I agree with Colonel Grant that separate survey numbers should be made instead of making sub-divisions, as it will tend to protect fully the rights of holders of small areas of coffee lands, who are increasing in number.

ALSO :—

Letter No. 252, dated 30th May 1895, from the Superintendent of Revenue Survey in Mysore, to the Chief Secretary to the Government of Mysore :—

I have the honor to state in reply to your No. 19817—R. F. 176-93 of the 3rd instant, that in my opinion the admission of a smaller minimum for transfers of coffee land than for relinquishments of the same would be to stultify the rules provided for the latter.

2. I am quite aware that in cases such as those now cited by the Deputy Commissioner in his letter under reference some inconvenience may be felt by the parties who have taken the land over from Kenchegauda and there is of course no fear of the lands being resigned but still the rules are prescribed for all and not individual cases and should be adhered to.

3. The only plan I can suggest to meet such cases as the present is to have the land transferred made into a separate survey number as a special case, the parties interested paying charges which should be estimated by the Deputy Commissioner to include pay of Taluk measurer, flag holders, &c., and intimated to the parties, after payment by whom the land should be demarcated into separate survey numbers. This is an absolutely safe course if it can be reconciled to the provisions of Section 109 of the Land Revenue Code which I think it can, if Government passes special orders.

No. 22960-8—R. F. 176-93-94, DATED, BANGALORE, 10TH JUNE 1895.

ORDER THEREON.—The Government observe that the minimum prescribed for dry lands ought not to apply to coffee lands, owing to the special features of which, a large minimum has been laid down. The limit prescribed for absolute relinquishment should be followed when dealing with transfers, as, if both kinds of transactions are not put on the same footing, the rule as to relinquishment may be very easily evaded by giving a transfer in one year and the transferree relinquishing it in the next year. The making of the portion thus transferred into a separate number will, far from mitigating the evil, enhance it. If it is not a separate number or a recognized share, it cannot be relinquished absolutely; whereas if it is, such facilities are increased for giving up parts of holding smaller than the required minimum area. Rule XXVI, para 3, of the Mysore Land Revenue Rules seems to contemplate a relinquishment in favor of more than one person; and if the transferrees in the present instance agree to a joint registry, the transfer may be accepted and the entries in the Register altered accordingly.

Letter No. 947—838, dated the 7th June 1895, from the Deputy Commissioner, Chitaldrug District, reporting that through the exertions of Amildars C. Shamiengar, Narasinga Rao, and Ramaswamaiya, the whole Land Revenue of the Hiriyur, Jagalur and Chitaldrug Taluks was recovered by the end of May 1895, with the exception of a sum of Rs. 352-2-1 due by General R. A. Cole to the Chitaldrug Taluk.

Letter No. 3767—1234, dated the 13th April 1895, from the Deputy Commissioner, Kolar District, recommending the appropriation of the marginally noted gomal land for cultivation purposes in the Subbanahalli village of the Chikballapur Taluk.

No. 23012-9—R. F. 2-94, DATED, BANGALORE, 12TH JUNE 1895.

ORDER THEREON.—Government observe that in the vernacular papers submitted by the Deputy Commissioner there is an order by Mr. Krishnaswamaiengar that he should be shown the land in question, but no further reference is forthcoming to show that he saw it. The land should therefore be inspected and a properly formed opinion submitted for the orders of Government, the present application being refused in the meanwhile.

2. Raiyats guilty of unauthorized appropriation must be duly punished. If the Amildar of Chikballapur has improperly countenanced such appropriation and permitted it as can be gathered from Mr. Krishnaswamaiengar's order, he should be severely reprimanded. This is not the first instance in which gomal lands have been rather arbitrarily dealt with by Taluk and village officials in the Kolar District.

Letter No. 1331, dated 27th May 1895, from the Deputy Commissioner of the Mysore District, to the Chief Secretary to the Government of Mysore.

With reference to Government Proceedings No. 39—D. H. O. of 29th November last, sanctioning the advance of Rs. 16,000 from the Treasury to the Agricultural Bank at Palhalli, I have the honor to state that since the establishment of the Bank, 51 more individuals have joined the Bank, making the total No. 67.

2. On account of the increase in the number of members, a meeting was held on the 8th December last in which the members have decided unanimously to apply for the grant of a deposit to the Bank up to a sum of Rs. 75,000. Proceedings passed at the meeting is herewith submitted.

3. The Amildar reports that the new members are also men of substance and respectability and recommends that the amount applied for may be advanced to the Bank.

4. I think a further advance of Rs. 14,000, may be sanctioned, making the total amount lent to the Bank Rs. 30,000.

5. The accounts and registers of the Bank were examined by a clerk of this office in January last and copy of his report is enclosed. I have asked the Comptroller to arrange for the audit of the accounts as provided in Government Proceedings No. 39—D. H. O., dated 30th November 1894.

Enclosure to Deputy Commissioner's No. 1331. Memorandum on the examination of accounts of the Agricultural Bank at Palhalli, Seringapatam Taluk, on the 27th January 1895.

The Bank was established on 18th November 1894 and is located in the house of Shanbhog Venkatkrishnappa who is the Honorary Treasurer and is in custody of cash, bonds and the accounts of the Bank, and is under the rules responsible for them. There were at the commencement only 16 members. Fifty-one more individuals having been subsequently admitted as members the number has come up to 67 at present.

2. In Proceedings No. 39—D. H. O. of 30th November 1894, the Government sanctioned Rs. 16,000 to be advanced for dealings in the Bank. Out of this amount the Bank has drawn Rs. 15,000 as per *margin from Seringapatam Taluk Treasury. In addition to this sum the members of the Bank noted in the †margin have deposited a sum of Rs. 1,400.

(4)	On simple bonds repayable in one year...	966
		14,041

The period allowed for repayment of the loans under the 3rd item is in excess of what is provided by rule 12, and the grant of advances in excess of Rs. 25 to individuals without security and for longer periods than three months under item No. 4 is contrary to rule 14. These discrepancies were pointed out to the Treasurer and other members present and instructions given to rectify them.

4. The bonds executed by the debtors in favor of the Bank were examined and found to have been written up properly.

5. The accounts maintained in the Bank are :—

1. Cash Book; 2. Ledgers; 3. Book for acknowledgment of loans granted from the Bank; 4. Chalan Book; 5. Order Book; 6. Minutes Book and 7 & 8 From and To Registers.

Chalan Book for drawing money from the Government Treasury is not made use of. Amount was drawn on a separate report to the Taluk Treasury Officer. It was explained that the book was received late from the Printing Office.

The entries in the Order Book are not satisfactory, as it does not contain the required information, *viz.*, the object of the loan and other particulars required to enable the Directors to decide whether the loan applied for should be granted or refused. The mode of making entries in this important record was fully explained to the members present.

No. 23315-6—R. 3399, DATED, BANGALORE, 15TH JUNE 1895.

ORDER THEREON.—The above report of the progress of the Palhalli Agricultural Bank is highly satisfactory and in the increase of the number of members from 16 to 67 in the space of six months and the deposit of Rs. 1,400 by the members, the Government recognize the promise of a very useful future before this institution. The additional loan of Rs. 1,400 recommended by the Deputy Commissioner is sanctioned on the same terms as the original loan of Rs. 16,000.

2. The Deputy Commissioner will cause enquiry to be made as to how far the suggestions of the auditor have been carried out by the Bank, especially with reference to the entries in the "Order Book," specifying the object for which loans are granted. Strict adherence to the rules prescribing the objects of the loans is of highest importance for the continuance of the success of the Bank and this should be fully explained to the Managers.

3. The Deputy Commissioner should report whether the members are drawn from a limited area as contemplated in the rules. This too is an essential condition of success.

4. A list should be submitted for the information of Government showing the residence of each of the 67 members, the extent and assessment of the lands each holds, and the village are villages in which they are situated. The register of members kept at the Bank's Office should contain this and other useful information.

5. The Comptroller will cause the accounts of the Bank to be audited as quickly as possible after the close of the year and submit a full report of the same.

Letter No. 1340, dated the 28th May 1895, from the Deputy Commissioner, Mysore District, submitting for the orders of Government, petition from Sahukar Viranmachari soliciting the grant of certain concessions in connection with the New Weaver's Lines, Mysore.

No. 23665-6—G. F. 112-92-93, DATED BANGALORE, 19TH JUNE 1895.

ORDER THEREON.—Sahukar Virannachari represents that, since the last measurement of the houses in the New Weaver village at Mysore, he has spent more money on the 158 houses referred to in Government Orders of 2nd April 1895, No. 16188-9—G. F. 112-92, and on 10 new houses and that therefore there are now 168 houses available for mortgage to the Government. The Deputy Commissioner will obtain from the Executive Engineer a valuation of these 168 houses and if such valuation exceeds Rs. 60,854 by Rs. 5,000 or more, the Deputy Commissioner will advance to the Sahukar such amount as may be necessary to raise the loan to him to Rs. 60,000 and to obtain from the Sahukar a proper Mortgage Deed for Rs. 60,000 on the terms prescribed in Government Orders No. 16188-9—R. F. 112-92, dated 2nd April 1895, subject however to the following modifications, *viz*:—

Firstly.—The Mortgage Deed should have effect from 1st July 1895.

Secondly.—The loan should be treated as carrying no interest till 30th June 1898, but towards the principal of it Rs. 4,000 should be paid on 30th June in 1896, 1897 and 1898, leaving a balance of principal of Rs. 48,000 on 1st July 1898; and

Thirdly.—This balance of principal should carry interest at 4 per cent from 1st July 1898, and be repayable by 13 annual payments of Rs. 4,800 each and a 14th payment of Rs. 96; these 14 payments to be made on the 30th June of each year, the first of such payments being made on 30th June 1899 and the last payment (of only Rs. 96) on 30th June 1912.

2. The Deputy Commissioner should conclude the mortgage on the above terms before the close of this month.

3. With reference to the concluding para of the orders of 2nd April 1895, the Comptroller will at once report if the figures given therein are correct according to his Books.

4. The concession of exemption from the Mohaturfa loom tax will be extended till 30th June 1898.

Letter No. 4294, dated 7th January 1895, from the Comptroller to the Government of Mysore.

I have the honor to forward herewith two reports one from the Bangalore, another from the Mysore District Treasury, of advances having been made from the Treasuries on the authority of the Deputy Commissioner without sanction of Government and the usual instructions from this office.

2. While fully realizing the urgent necessity in both cases, I yet feel it my duty to point out that such payments from Treasuries are altogether opposed to the Account Code Article 5 of which is very clear and peremptory on the point.

3. The only advance which Heads of Departments are authorized to sanction on their own responsibility are enumerated in Article 137 and the advances now under objection do not come under it.

4. This is not the only instance brought to the notice of Government in which such unauthorized payments have been made from District Treasuries.

5. I consider, therefore, that some special orders of Government are necessary, strictly prohibiting such payments, but giving at the same time some facilities to Heads of Departments and Districts to supply themselves with funds to meet very extraordinary and emergent requirements.

6. I am, however, averse to any special concessions in regard to advances being drawn from the Treasuries. They lead to advances being drawn and not accounted for, for years together. I would advocate the permanent advances of Deputy Commissioners and other Heads of offices, as require such special concessions, being increased, to say, Rs. 300 for Heads of Departments and the Deputy Commissioners of the Bangalore and Mysore Districts, and Rs. 200 for other Deputy Commissioners to meet urgent requirements, and recouped on detailed bills which come under the scrutiny of Government and the detailed audit of this office.

READ AGAIN :—

Government Proceedings No. 12342-77—L. F. 132-94, dated 15th February 1895.

No. 12342-77—L. F. 132-94, DATED, BANGALORE, 15TH FEBRUARY 1895.

ORDER.—Frequent instances have occurred in which the Deputy Commissioners have taken upon themselves to spend money in anticipation of Government sanction. This is not right. If the expenditure is urgent, sanction should be applied for by wire, and no expenditure incurred without previous sanction will be passed in future. This order should be considered applicable to all Funds—Provincial, Municipal and Local.

No. 24251-84—R. 3538, DATED, BANGALORE, 19TH JUNE 1895.

ORDER THEREON.—In drawing the attention of Officers to the Government order read above, the Government direct that the same be strictly adhered to.

2. Government are pleased to increase, as recommended by the Comptroller, the permanent advances of the Heads of Departments and the Deputy Commissioners of the Bangalore and Mysore Districts to Rs. 500, and those of the other Deputy Commissioners to Rs. 200, to meet urgent requirements, subject to recoupment on detailed bills as suggested by the Comptroller.

3. When, by an order of Government, an advance is directed to be given to an Officer, the order will invariably specify the purpose for which the advance is given and be communicated to the Comptroller. Every such advance must be adjusted by the end of the month succeeding the one in which the advance is drawn, where the date within which adjustment should be made is not prescribed in the order itself.

Letter No. 7148, dated 11th June 1895, from the Comptroller to the Government of Mysore.

I have the honor to request that Deputy Commissioners of Districts may be directed to intimate any corrections that they may desire to be made in the Treasury Accounts to the Treasury Officers on or before the 15th August 1895, the latest, so that the same may be intimated to this office by the Treasury Officers to allow of such corrections being brought on the books of this office, before they are finally closed and thus obviate any difference between the accounts furnished to Government by Revenue Officers and those furnished by me. The Treasury Officers have been directed not to attend to any corrections that may be received after the 18th August next.

No. 23727-35—R. 3461, DATED, BANGALORE 19TH JUNE 1895.

ORDER THEREON.—Communicated to Deputy Commissioners of Districts, who are requested to intimate to the Treasury Officers all corrections to be made in the Treasury Accounts before the 15th August 1895 at the latest.

Docket No. 497—429, dated 25th January 1894, from the Deputy Commissioner of Chitaldrug, suggesting that the rule of charging 1 rupee on single bullock carts, which obtains in Municipalities, should be extended to rural parts also.

2. Docket No. 2915—677, dated 24th February 1894, from the Deputy Commissioner, Kolar, requesting instructions, with reference to Government Proceedings No. 1886—L. 293, dated 3rd May 1892, whether carts and springed carriages kept for private use and convenience should be taxed.

3. Letter No. 3917—1208, dated 22nd April 1895, from the Deputy Commissioner, Kolar District, soliciting orders regarding the classes of carts to be exempted from the tax.

No. 24641-50—R. F. 245-92, DATED, BANGALORE, 25TH JUNE 1895.

ORDER THEREON.—The doubts expressed in the above references, as to the scope of the existing rules on the levy of the cart tax, seem to proceed from a misconception of the spirit of the Government Order No. 1886—L. 293, dated 3rd May 1892; and the following instructions are, therefore, laid down for future guidance :—

(1) In Municipalities, all carts, whether belonging to agriculturists or other persons, and whether plying for hire or used for private purposes only, should pay the tax.

(2) In rural parts and non-municipal villages, carts belonging to persons whose primary and sole occupation is agriculture should be exempted, even though they may occasionally hire out their carts during other than agricultural seasons, provided they are not stone Waddars, Merchants, Traders, Contractors, &c., who follow some other profession or occupation besides agriculture. Who are agriculturists entitled to this exemption and who are not, would, of course, depend upon the circumstances of each case and must be determined after proper enquiry. No inflexible rule can be laid down for the guidance of the Jamabandi Officer, who must exercise sound discretion in assessing and levying the tax, so that the principle laid down in the Rules of * 1871 may be strictly adhered to.

*No. 36 to 38—G 1, dated 31st March 1871.

(3) In all places, Municipalities and villages, carts drawn by a single bullock should be charged a rate of 1 rupee each.

The President of Municipalities of Bangalore and Mysore Cities.

No. 25071-79—R. 3736, DATED, BANGALORE, 28TH JUNE 1895.

ORDER.—In Proceedings No. 10607-16—R. 1597, dated 20th December 1894, it was directed that when default was made in the construction of a well and the amount of the preliminary advances made therefor remained to be recovered as an arrear of Revenue under para 2 of Rule 16 of the Special Rules under the Land Improvement Loans Regulation, issued with Notification No. 183, dated 21st July 1891, no interest should be charged on the advances. In cancelling the above order the Government resolve to issue the following Notification which will take effect from this date :—

Notification No. 25080—R. 3737.

The Government of Mysore direct that in the concluding portion of para 2 of Rule 16 of the Special Rules under the Land Improvement Loans Regulation, contained in Notification No. 183, dated 21st July 1891, for the sentence beginning with the words "If default" and closing with the words "of Revenue," the following be substituted—

"If default is made in the construction of the well the amount of the "preliminary advances authorized by this Rule will be recoverable *with interest* "from the applicant as arrears of Land Revenue".

The Sub-Division Officer on special Duty in connection with Irrigation wells.

No. 25081-89—R. 3738, DATED, BANGALORE, 28TH JUNE 1895.

ORDER.—As the Rules for the grant of loans for the construction of irrigation wells contained in Government Notification No. 183, dated 21st July 1891, apply in the case of wet and garden lands also, the Deputy Commissioners of Districts and the Sub-Division officer on special duty in connection with irrigation wells will understand that it is their duty to entertain applications for the grant of loans for the construction of wells in such lands, and after the requisite enquiry to submit them with their recommendations for the orders of Government. Such applications may be rejected if after enquiry they find such a course called for.

Letter No. 1017, dated 7th March 1895, from the Chief Engineer of Mysore, submitting an application from Department of Public Works Supervisor B. Vasantappa for permission to purchase the marginally noted lands under the channels of the Borankanve Reservior in the Huliyar Sub-Taluk, and disapproving of Department of Public Works men acquiring lands below tanks or channels, and also expressing a doubt as to whether permission should be given to their purchasing ordinary dry or waste lands so long as they are in service.

No. 24973—R. 3701, DATED, BANGALORE, 26TH JUNE 1895.

ORDER THEREON.—Government observe that in an agricultural country like Mysore with a service drawn from the people of the country the rules of British India prohibiting European officers acquiring lands must not, be applied (*vide* Rules under the Land Revenue Code.)

2. The policy of the Darbar is to permit Government servants to acquire lands, when such acquisition is perfectly above-board, the lands are outside the jurisdiction of the officer acquiring, and the officer not dividing his attention between his official duty and his lands. The policy should be the same in all Government Departments. Every case of proposed acquisition will of course be scrutinized and sanction refused if any use of official position now or hereafter is to be apprehended, but no public official must be placed under a disability to acquire lands. To do so will only compel them to resort to *benami* transactions.

3. The Chief Engineer will deal with Supervisor Vasantappa's present application in accordance with the foregoing observations.

Statements Nos. I and II of Minerals and Gems produced in the several Districts of the Province for the calendar year 1894.

Statements of Mines and Quarries received from Districts for the official year 1893-94.

No. 25058-65—R. F. 52-92, DATED, BANGALORE, 28TH JUNE 1895.

ORDER THEREON.—It is observed that the quantity and value of iron ore produced in the Chitaldroog District as exhibited in return No. I of Minerals and Gems read above, are the same as those exhibited in the statement received for the previous year 1893. The point that there was no difference in the quantity and value for both the years is open to doubt and requires elucidation.

2. In statement No. II of the Bangalore District a sum of Rs. 402 has been exhibited as the value of corundum, but the quantity produced has not been entered. The Deputy Commissioner's attention is drawn to para 3 of Government Proceedings No. 14952-60—R. F. 175-92, dated 14th March 1895, conveying instructions as to the mode of ascertaining the quantity collected by the lessees of this mineral, and he is requested to enter in his future returns the quantity produced.

3. The difference between the value per cwt. of corundum, soapstone, granite, &c., as calculated on the amounts entered in the returns of certain Districts and that given in the returns of other Districts is marked as noted below. Deputy Commissioners should hereafter satisfy themselves as to the correctness of figures furnished by Amildars and then enter the same in their abstracts to be submitted to this office :—

	Corundum.	Soapstone.	Clays.	Granite.	Laterite.	Lime-stone.

4. The statements of mines and quarries for the year 1893-94 read above give the quantity of iron, &c., in maunds. It is not clear from any of the returns whether the maund is the local maund or Bengal maund as the prices given average between Rs. 2 and 3 per maund it is presumed that the quantity is given in local maunds. In future returns this point should be made clear.

5. In some of the District returns, no information has been furnished regarding the production of corundum, soapstone and asbestos, although the return of minerals and gems for the calendar year 1894 contains details of quantity of such minerals produced as noted on the margin. This omission leads to the inference that the particulars entered in the return of minerals necessarily relate to the 2nd half of the calendar year 1894. The Deputy Commissioners concerned should report whether such is the case. If otherwise, the returns now under reference. (mines and quarries) should be considered as incomplete and inaccurate.

Tumkur ...	713 Cwts.	...	...
Chitaldrug ...	2 Cwts.	450 Cwts.	...
Kadur ...	...	120 Cwts.	...
Hassan ...	...	...	5 Cwts.

6. In the return of the Kadur District, 1,720 maunds of iron are entered as having been produced during the year 1893-94, while the returns of minerals and gems for the two calendar years 1893 and 1894 do not give any figure under column "iron ores." This inconsistency needs explanation.

7. The rate per cwt. of soapstone produced in the Hassan District comes to Rs. 1-2-7, whereas the rate as per statement of minerals is Re. 0-2-4 only. This large difference should be accounted for.

8. The total number of mines entered in the return of the Kolar District is 361, of which 69 are stated to be stone and gold mines, 73 stone and iron mines and 219 stone mines. Out of these 361 mines again only 142 mines are shown as having been worked during the year, no entry being made against the remaining number. To conform to the heading of column 2 (mineral produce) in the existing form of the return, it does not appear necessary to enter the number of mines other than that of metals and minerals. Deputy Commissioners should hereafter exclude from their future returns the number of mines of quarry stones. On a comparison of the number of mines as entered in the returns for the years 1891-92, 1892-93 and 1893-94, it is apparent that the actual number of mines worked during the year is being entered in some of the District returns, while in others the total number of mines in the District are exhibited. With a view to secure uniformity and completeness, Deputy Commissioners are requested to sub-divide the column "No. of Mines" as indicated in the margin and enter therein the requisite particulars. It should be noted that the number of each description of mines, such as gold, iron, kuranga, soapstone, mica, &c., should be separately and distinctly entered against each Taluk wherein such mines exist. If there be any large difference in the number of mines worked during any year as compared with the number for the preceding year, the cause of increase or decrease, as the case may be, should ***invariably*** be explained at foot of the return.

Proceedings of the Government of Mysore.

READ:—

Letter No. 5005, dated the 8th March 1895, from the Comptroller in Mysore, submitting for orders of Government, the Budget Estimates of the Forest Department for 1895-96.

2. Letter No. 3570—270, dated the 30th April 1895, from the Inspector General of Forests, with enclosures, submitting explanations in regard to certain provision found to be in excess of previous year's allotment.

No. 22646-7—R. F. 220-92, DATED BANGALORE, 10TH JUNE 1895.

ORDER THEREON.—Under the marginally noted items a larger revenue is anticipated for the next official year 1895-96, but the estimated income from the other heads falls very much below the sanctioned estimate of receipts for 1894-95. The net result is that the revenues under all heads estimated at Rs. 13,58,500 are less than those of the previous year by Rs. 15,000. No explanation is afforded for the large decrease under III (1*a*) Timber, (*d*) Sandalwood and (2*e*) Other minor produce. These forecasts will however be accepted.

iii. Forests—
1 (*b*.) Firewood and charcoal.
(*c*.) Grass and other minor produce.
2 (*c*.) Bamboos.
5 (*c*.) Other sources.
and 6 (*a*.) Sale proceeds of elephants.

2. The total expenditure budgetted for for 1895-96, amounting to Rs. 5,40,000, exceeds the amount sanctioned for 1894-95 by Rs. 34,512; but it is shown that the increased outlay under Establishments is owing to the revision of the old scale as to strength and pay sanctioned in Government Proceedings No. 8961-70—R. 1339, dated 2nd December 1894.

3. Rupees 2,810 more than in 1894-95 is provided under I (*a*) Timber; the explanation given for the extra provision is that more timber is proposed to be and will be collected at the Depôts of the Mysore and Kadur Districts to meet the increasing demands of the markets. The Inspector General also recommends a further addition of Rs. 10,000 to be spent on the *exploitation* of dead or dry timber now lying waste on hill slopes and in nullas, and in order to collect and bring to book all such timber, the Budget provision will accordingly be increased by Rs. 10,000 subject, however, to the submission of a detailed report of the working plan and the localities in which the operations are to be made and of the special arrangements as to control and supervision which should be maintained. But it is a matter for consideration, on which the opinion of the Inspector General of Forests is requested, whether it would not be far cheaper to permit consumers themselves to remove the timber from the jungles under proper supervision and control and whether by using elephants, the carting of carriage cannot be very largely reduced. If elephants are used to drag the timber to the roads, they can afterwards be easily carried to the nearest markets, or, if too heavy, may be properly sawed up and then carried.

4. Rupees 14,580 is the additional sum proposed to be spent under 1 (*b*) Firewood and charcoal, but the estimated additional receipts under this head are only Rs. 11,625. The Government are not disposed to accept the proposal under this head, as the excess of income is more problematical than that from timber, and direct, therefore, that the charges under this head be reduced to the sum allowed in 1894-95. An increased expenditure is provided under Roads amounting to Rs. 2,975. This is allowed; but the amount should not be spent without due estimate and sanction.

5. Under "Buildings", the proposed expenditure is less by Rs. 3,700 than was sanctioned for 1894-95. The estimate will be retained subject to the submission of a detailed statement of the proposed buildings. No work should be commenced until proper plans and estimates are submitted to and sanctioned by Government. A sum of Rs. 10,000 has been added under "Buildings" as requested in the Inspector General's letter No. 3704—296, dated 10th May 1895, for adapting the old Garrison Hospital in the Bangalore Fort into a Sandal Kothi.

6. The allotment under 8 (*b*) "Compensation for land and rights", will be reduced to Rs. 700 which is the amount sanctioned for 1894-95, as the amount

of compensation for the purchase of lands included in the newly constituted Narayandrug State Forest has already been sanctioned in Proceedings No. 18078-9—R. 2618, dated 20th April 1895.

7. The proposed increased expenditure under "Plantations" is opposed to the oft-expressed views of Government, and the actuals for 1893-94 show that only about Rs. 50,000 was spent on them. The provision will therefore be reduced from Rs. 62,700 to 50,000 as, with half a lakh properly spent every year, the Government are of opinion that the reproductive operations can be both efficiently and extensively carried out.

8. The proposed expenditure under the head 10 "Elephant Khedda working charges", seems to be based on no proper data. No details for any of the items of expenditure, except the fixed establishment, are given; the head "Sundries" appears in several places with lumpsums, and no allusion is made in the Superintendent's letter to the contract system recently proposed by the Field Inspector of the Khedda. The estimated expenditure will be reduced to Rs. 50,000 subject to increase, if necessary, by a Supplemental Budget to be submitted with full details. Similarly, whatever extra expenditure has to be incurred in connection with the expected visit of the Viceroy will, on application, be specially sanctioned, and on the requisition of the Superintendent, a special advance will, if required, be made for the occasion, subject to adjustment in the usual course.

9. The Budget Estimates, as above modified, are summaried below:—

Letter No. 173, dated 1st February 1895, from the Superintendent, Government Botanical Gardens, submitting the Budget Estimates of the Botanical Gardens and Parks, &c., in Bangalore and of the Gordon Park at Mysore for the year 1895-96.

No. 24079-80—R. 3490, DATED, BANGALORE, 16TH JUNE 1895.

ORDER THEREON.—The Budget Estimate of expenditure of the Gordon Park at Mysore for the year 1895-96 amounting to Rs. 3,128, which stands the same as in 1894-95, is passed.

2. The other Budget Estimate submitted with the above includes charges for I Government Botanical Gardens, II Cubbon Park and III Grounds of the Dewan's Official Residence at Bangalore. The estimated expenditure of II and III for the year 1895-96 amounting to Rs. 1,740 and Rs. 588, respectively, is allowed to stand, there being no difference between these and the current year's figures.

3. The expenditure of the Government Botanical Gardens for the year 1895-96 is estimated at Rs. 24,000 against Rs. 23,796 for the current year. The difference is due to the provision made for increases to certain officials and servants and to a reduced provision of Rs. 72 against item "Apprentice Gardeners." The question of granting an increase to the salaries of the permanent establishment should form the subject of a separate communication, and the increased provision of Rs. 276 made on this account will accordingly be disallowed and the amount of expenditure under this head for the ensuing year fixed at Rs. 23,724.

4. The receipts of the Botanical Gardens and Cubbon Park for 1895-96 are estimated as in the current year at Rs. 2,600 and Rs. 600, respectively, while the actuals for 1893-94 were Rs. 2,217-7-8 under the former and Rs. 340-3-0 under the latter head. This estimate is passed.

The following letter No. 3995—321, dated the 29th May 1895, from the Inspector General of Forests in Mysore to the General Secretary to Government.

I have the honor to submit, for approval and publication, a draft notification as regards the State Forests and Plantations formed in the Shimoga District from 1888 to 1893.

2. These Forests, in order to prevent the denudation on which they were reported to be verging, and whose conservancy and improvement were proposed by the District Forest officer and the Deputy Commissioner, were brought under reservation after thorough settlement by the Revenue officers deputed for the purpose by the Deputy Commissioner, in conformity with the views of Government contained in para 6 of Forest Report for 1878-79 and in para 9 of Government Proceedings No. 619-19, dated 27th April 1881. I beg also to invite attention to paras 1 and 7 of my Administration Report for 1888-89.

3. Where the new forests were contiguous or adjacent to the existing State forests provided with watching establishments, a re distribution of the same was made supplemented by additional guards employed on working charges as a temporary measure. The Deputy Commissioner has submitted a list of the above temporary establishments with a view to the same being brought on the permanent strength of the department, with needful addition for the due conservancy and working of the forests concerned. This matter along with the proposals from the other Districts will be dealt with in a separate communication. Meanwhile I beg that the list of forests may, as requested in para 1, be notified at an early date as they have been treated as Reserves from the time they were brought under conservancy regulations and on the list of State Forests.

4. Printed copies of boundary notifications of the above forests and plantations are submitted for reference. Similar notifications of the State Forests constituted in the other Districts will be submitted later on when received from the Deputy Commissioners.

No. 23537—R. 3436, DATED, BANGALORE, 19TH JUNE 1895.

ORDER THEREON.—The Government are pleased to direct that a Notification as hereunder be prepared and published in the Mysore Gazette as recommended by the Inspector General.

2. Under Section 9 of the Forest Rules of 1878 the proclamation of the demarcation and boundaries of every State Forest should be made in the Taluk where the forest is situated. The Inspector General is requested to see that this is done.

C. SREENIVASIENGAR,
Revenue Secretary.

To—The Inspector General of Forests in Mysore.

No. Gl. 25538—*R.* 3437, *dated* 19*th June* 1895.

Under the provisions of Section 9 of the Forest Rules of 1878 the Government of Mysore are pleased to declare that the undermentioned demarcated and settled forests and plantations in the *Shimoga District* shall be classed as State Forests under rule 1 of the aforesaid Forest Rules.

No.	Names of Forests and Plantations.	Area.	Boundaries.
1	Shankar State Forest.	36 Sq. miles, Distance round 26 miles.	*On the North.*—Starting from the Mudinkatte Chowdi mango tree on the Sirgere-Hanagere road and going as the hands of a clock the demarcation line runs east leaving the lands of Sirgere and Tavarkop to the left and passing Survey Nos. 62 and 61 of Sirgere village, goes through the middle of Survey No. 26 of Manjarikoppa village. From here it includes a small portion of Survey No. 61 of Chithalu village and ends at Narsapur Taluk in Survey No. 50 of Chauhalli village. *On the East.*—From the above tank the line goes southwards through Survey No. 34 of Manjarikoppa to the bandhs of Survey Nos. 34, 35, 36 and 32 of the same village. Thence it goes through Survey Nos. 37 and 36 of Manjarikoppa and between Survey Nos. 25 and 26 of Shettihalli up to the Shimoga-Shettihalli road which it meets at a point a furlong from Gudanakallu bandhs of the Agasvalli Inam boundary. From here it goes to the bandhs of Chitra Shettihalli and Agasvalli and continuing along Kanihalla stream ends at the bandhs of Kudgalmane and Survey Nos. 27 and 28 of Shettihalli. *On the South.*—From the last mentioned point it follows Kudgalmane Inam boundary as far as Vurmardi hill of Hanagere and including it, passes along Gobragundihalla and Nayimuttadahalla ending at the Hanagere Mukanhalla near the Forest Lodge. *On the West.*—From this point of the halla it goes northwards along the Sirgere-Hanagere road which is the old demarcation as far as the Mudinkatte Chowdi mango tree, the starting point.
2	Sacrebail State Forest.	15 Sq. miles, Distance round 19 miles.	*On the North.*—Starting from the bandhs of Survey No. 27 of Shettihalli village and Kudgalmane Inam village the demarcation line goes north-east along the Kanihalla stream which divides Shankar State Forest from Sacrebail State Forest to the bandhs of the inam village of Agasvalli and Survey No. 25 of Agasvalli. From here it goes along the Agasvalli Inam boundary (that is, along Kanihalla) up to the bandhs of Bassapur village and continues along Bassapur village limits up to the commencement of Ichwadi village boundary, and continuing along the latter village boundary ends at the meeting of the boundaries of Ichwadi, Tinikapur and Tattikere. *On the East.*—From the above bandhs the line goes south *viâ* Santankere crossing the road leading from Tattikere to Kigdi and Nogonurkadahalla and leaving Kuttumankere to the left joins on to the road at the 9th mile-stone of the Shimoga-Tirthahalli road. From here it continues along the above road to Vithanallappan Kanave. *On the South.*—From the above Kanave it goes along the above road up to the 12th mile 5th furlong which is all the old demarcation line. *On the West.*—From the above point at the 5th furlong it goes northwards along the old demarcation line up to the limit of the Tirthahalli Taluk below Balekalmatti. Thence continues along the limits of Kigdi village boundaries up to Kudgalmane boundary. Then following the Kudgalmane Inam boundary closes at Kanihalla adjoining Survey No. of 27 of Shettihalli the starting point on the north. *N. B.*—A cleared line from 6 to 10 feet wide has been cut round the above forests in most parts and mile and furlong stones are in course of erection, while in other parts where Inam Forests adjoining the State Forests, rough stones 4 feet in height have been erected at every 100 yards.

Shimoga District Forests and Plantations—*contd.*

No.	Names of Forests and Plantations.	Area.	Boundaries.
3	Malebennur.	11¼ Sq. miles. Distance round 18 miles.	*On the North.*—The demarcation line starts from the 2 stones and bandhs of Survey No. 73 of Gudad Tuminkatte in Davangere Taluk and proceeds eastwards through Survey No. 63 to 3 bandhs of Survey Nos. 45 and 32 of the same village. From here it goes along borders of cultivated lands and Survey Nos. 41 and 33 up to the bandhs of cultivated land No. 28. It passes then through part of Survey Nos. 27 and 26 to the 3 bandhs of Survey Nos. 151 and 152 of Malebennur village and through No. 151 of the above village and No. 80 of Komaranhalli to the 3 bandhs of Survey Nos. 79, 78 and 80 of the latter. From here it goes along No. 78 including it to the 3 bandhs of 77, 78 and 80 and then continues to the Honnali-Malebennur road between the 32nd and 33rd mile-stones excluding the Halla where the cattle are watered. *On the East.*—From the above point on the Harihar-Malebennur road it goes south to the 3rd furlong of the 31st mile on the same road. *On the South.*—From the above point on the road (*viz.*, 3rd furlong of the 31st mile) it goes through Survey No. 85 to the 3 bandhs and stone at the point of Nos. 85 and 79. Thence through No. 85 to the 3 bandhs of 82, 84 and 85. From here straight along the border of 84 to the 4 bandhs of Survey Nos. 83, 84 and 30 of Hiregonigere. From here to the 2 bandhs of No. 29 of the same village along its border and on to the 2 bandhs of No. 34. From here through No. 33 straight on to the stone bandhs of No. 52 and on again to the 2 stone bandhs of No. 53. Notification No. 1492, dated. Camp Mysore, 25th November 1885.

In supersession of the rules contained in Notification No. 16, dated 15th April 1879, issued by the Secretary to the late Chief Commissioner, the following Rules regarding the rights of occupants of Kans in the Nagar Malnad Taluks are published for the information and guidance of all concerned :—

Rule 1.—The occupant of a Kan has the right to tap toddy trees, subject to the Abkari Rules, and to cultivate pepper, also to collect gum and honey and all jungle produce; he may further collect leaves (soppu) for manure for use in the Kan itself, and cut underwood and thin out top branches to the extent absolutely necessary for securing the growth of the pepper vine

Rule 2.—The Kan-holder has the right to lop unreserved trees growing in the Kan for soppu to be used in the Kan itself.

Rule 3.—Where a Kan extends to within 50 yards of the Kan-holder's house, he has the right to fell any unreserved trees, or to lop for soppu any reserved trees, which may be growing within 50 yards of his house on any side. Within those limits he is allowed full liberty to plant any trees or carry on any cultivation whatsoever. The soppu lopped under this Rule must be used within the Kan itself.

Rule 4.—Except in the cases covered by the foregoing Rules, the Kan-holder has, as regards trees growing in the Kan, no right, either—

(*a*) to fell or injure any timber whatever, reserved or unreserved,

or (*b*) to lop for "soppu" or otherwise to injure or interfere with, any reserved tree.

If, in violation of this rule, he cuts or injures the timber of any tree, or lops for "soppu" or otherwise injures any reserved tree, the terms of the tenure of the Kan shall be considered to have been broken and the Kan shall be resumed, the offender being further liable to punishment for breach of the Forest Rules.

Rule 5.—The Kan-holder has no right to plant coffee in the Kan and infringement of the conditions of the Kan tenure by planting coffee will render the Kan liable to be resumed.

II. Letter No. 3432—255, dated 23rd April 1895, from the Inspector General of Forests in Mysore to the General Secretary to the Government of Mysore.

In forwarding, herewith, copy of letter No. C. 1, dated 20th October 1894, from the Deputy Commissioner, Shimoga District, together with a copy of its enclosure, I have the honor to state that Rule 1 in Government Notification No. 1492, dated 25th November 1885, provides—"The occupant of a Kan has the right to tap toddy trees, subject to the Abkari Rules." Accordingly the occupant of a Kan can manufacture, or cause to be manufactured, toddy from the trees in his holding subject to the following restrictions under the Abkari Laws and Rules in force :—

(1) To manufacture *fermented* toddy a license shall be obtained from the Deputy Commissioner as per Section 5 of the Excise Act.

(2) No quantity of fermented toddy larger than four seers or imperial quarts shall be possessed without a license from the Deputy Commissioner.

(3) To manufacture or possess unfermented toddy intended to be used for the manufacture of sugar or molasses, no license of any kind is required (*vide* clause (*b*) of Section 21 of the Excise Act).

(4) No fermented toddy shall be sold except under a license granted by the Deputy Commissioner, (*vide* Sections 12 and 13 of the Excise Act).

(5) As under License Rules made by the Government under Section 13 of the Excise Act, nobody else but a Government Farmer has the right to manufacture and sell fermented toddy, the occupant of a Kan cannot manufacture and sell fermented toddy; but he can tap the trees and manufacture unfermented toddy for making jaggory or sugar. He can also utilize it for domestic consumption irrespective of quantity *before it ferments*, but *after it ferments*, he cannot possess more than four seers of it.

(6) As per License Rules under the Excise Act, and also Rule XXIII (1) of the Rules under the Land Revenue Code, Government Farmers alone are at liberty to manufacture fermented toddy from the toddy-yielding trees in occupied lands, after obtaining the occupant's consent.

2. Under para 15 of the Coffee Land Rules, the grantees of coffee lands can draw toddy from the trees in their lands for the making of bread or other *bona fide* domestic purpose, but not otherwise. But Rule 1 in Government Notification No. 1492, dated 25th November 1885, quoted above, is not clear on the point. I have no objection, however, to the occupants of Kans being allowed the same concession as the grantees of coffee lands. I beg therefore to recommended that the above Rule 1 may be amended as follows :—

"The occupant of a Kan has the right to draw toddy from the toddy-yielding trees in his Kan, only for the use of the members of his family, but not for sale or for the use of his servants, laborers or other employes, the Government Farmers of Toddy Vend being alone entitled to draw toddy for sale after obtaining the occupant's consent. The occupant of a Kan has also the right to cultivate pepper, to collect gum and honey, and also other jungle produce; he may further collect leaves (soppu) for manure for use in the Kan itself, and cut under wood and thin out top branches to the extent absolutely necessary for securing the growth of the pepper vine."

No. 24559—R. 3596, DATED, BANGALORE, 22ND JUNE 1895.

ORDER THEREON.—**Under the circumstances represented in the above, the modification proposed by the Inspector General of Forests is approved.**

2. The following Notification will accordingly be published in three successive issues of the Mysore Gazette :—

Notification No. 24560—R. 3597, dated 22nd June 1895.

The Government of Mysore are pleased to sanction the following amendments to the existing "Kán" Rules published under Government Notification No. 1492, dated 25th November 1885 :—For "Rule 1" substitute the following :—

"The occupant of a Kán has the right to draw toddy from the toddy-yielding trees in his Kán, only for the use of the members of his

for the use of his servants, labourers or other employes, the Government Farmers of Toddy Vend being alone entitled to draw toddy for sale after obtaining the occupant's consent. The occupant of a Kan has also the right to cultivate pepper, to collect gum and honey and also other jungle produce; he may further collect leaves (soppu) for manure for use in the Kán itself and cut under-wood and thin out the upper branches to the extent absolutely necessary for securing the growth of the pepper vine."

Para 3 of Chief Secretary's letter to the First Assistant Resident No. 12424—R. F. 69-93, dated 30th January 1894 (printed below)—

"The grant of timber at cost price was made on a few previous occasions to certain Charitable Institutions both within and without the Mysore jurisdiction, but this mode of granting aid was found to be inconvenient and had to be abandoned. All grants-in-aid which the State feels called upon to give are accordingly now given in cash and not in timber."

No. 24604-12—R. F. 69-93, DATED, BANGALORE, 25TH JUNE 1895.

ORDER THEREON.—The practice of granting timber to charitable institutions, either free of payment or at favorable rates, has been discontinued as being inconvenient. The Government therefore regret that they cannot comply with Reverend Father Laurent's request.

Letter No. C. 385, dated the 19th June 1895, from the Inspector General of Forests in Mysore, with its enclosures.

In submitting herewith copy of docket No. 248—R. F., dated 1st instant, and of its enclosure, from the Deputy Commissioner, Hassan, as regards the enhancement of Depôt rates, I have the honor to state that the introduction of such rates into the Hassan Depôt from 1st March last as regards timber and from the 1st current as regards bamboos, subject to sanction of Government might have been deferred by the Deputy Commissioner till such sanction was obtained, but as higher rates have already been brought into force, and in which I generally concur. I beg the same may be sanctioned tentatively subject to a report after a year's trial for the continuance or otherwise of such rates. The demand for timber and bamboos is brisk at Hassan, and as the low rates sanctioned in Government Notification, Camp—No. 789, dated the 26th June 1888, at the opening of the Depôt at Hassan, in connection with the Sandal Kothi, continued to rule till recently in the face of increased cost of collection, the Government has not hitherto been getting its fair share of profit in the Depôt transactions and which it is now sought to secure by the introduction of higher rates after an interval of seven years.

A Draft Notification is submitted for approval and publication.

No. 248—R. F., dated the 1st June 1895, from the Deputy Commissioner, Hassan District, to the Inspector General of Forests in Mysore, enclosure to No. C. 385.

Has the honor to forward herewith copy of memo dated 7th March last, from the District Forest Officer submitting proposals for revising the selling rates of timber and bamboos at the Hassan Depôt and to state that the undersigned has approved of the higher rates and the same have been introduced for timber from 1st March 1895, and for bamboos from 1st June 1895. Requests that the revised rates, if sanctioned, may be notified in the Mysore Gazette for general information.

No. 24759-67—R. 3644, DATED, BANGALORE, 26TH JUNE 1895.

ORDER THEREON.—The Government are pleased to sanction the enhancement of the rates for timber and bamboos, tentatively, as recommended by the Inspector General.

2. The notification will be duly published in the Mysore Gazette.

3. As remarked by Mr. Ricketts the Deputy Commissioner should not have raised the rates for timber without the previous sanction of Government.

Proceedings of the Government of Mysore,

READ AGAIN :—

Petition registered No. 2041, dated 4th February 1893, from Chikanna and others of Adavi Gollavarhalli, Chikballapur Taluk, complaining against the order of the Kolar Deputy Commissioner, imposing on them a trade-tax of Rs. 2 per head in 1891-92 for selling cocoons.

2. Government Order No. 3894-6—Pet. 344, dated 23rd August 1893.

3. Letters Nos. 423 and 1177, dated 27th September 1893 and 23rd April 1894, respectively, from the Deputy Commissioners of the Bangalore and Mysore Districts submitting the reports called for as to the practice in those Districts.

No. 24044-51—P. F. 99-94, DATED, BANGALORE, 18TH JUNE 1895.

ORDER THEREON.—The Mohatarfa system of taxation is intended to reach those classes who do not contribute to the Land Revenue, and hence the exemption of agricultural raiyats. This exemption is continued if, for the disposal of his agricultural produce, the grower follows another profession such as rearing silk-worms, &c., and uses up the produce of his own fields. But when this subsidiary occupation of rearing silk-worms is expended so as to necessitate the buying of mulberry leaves grown by others, it no longer retains that secondary and subordinate position, but becomes the principal occupation of the raiyat who loses also his character of being primarily an agriculturist. The reason of exemption also disappears to the extent of the expansion of the new profession. In such cases, the Mohatarfa tax is either fully or partially imposed in proportion to the ratio which agriculture bears to the other profession. As a weaver buys cotton and weaves it into cloth, so a rearer of silk-worms makes cocoons and sells them; and both are equally liable to the Mohatarfa tax.

2. Applying these principles to the case in question, it is clear that the petitioners have rendered themselves liable to pay the Mohatarfa tax imposed upon them. There is enough of evidence to support the finding of the Deputy Commissioner that the petitioners have been buying mulberry leaves to rear their silk-worms and that this occupation is not therefore subsidiary to that of agriculture.

READ THE FOLLOWING PAPERS :—

Application dated 20th December 1894, from Mr. C. E. Murray Aynsley, coffee planter, for the grant of the Jodi Sanyasihalli village, attached to the Sivaganga Matt for cultivation on Shraya tenure.

Correspondence on the above ending with Kanarese letter No. 106, dated 19th March 1895, from the Survey Superintendent in Mysore.

Muzrai Superintendent's memo dated 1st June 1895.

No. 1077—Muz. F. 36-93, DATED, BANGALORE, 1ST JUNE 1895.

ORDER THEREON.—The village of Sanyasihalli in Devanhalli Taluk is a Jodi Inam village attached to the Sivaganga Matt. This village, along with other Inam villages forming the Matt's endowments, is now under the direct management of the Muzrai Department, under orders conveyed in Government Proceedings, No. 694-7—Muz. F. 36-93, dated 23rd December 1893.

2. The village in question being a Bechrakh one, Mr. C. E. Murray Aynsley, a coffee planter, has applied for the grant of the village lands to him for cultivation on Shraya tenure, and has agreed to pay to the Matt whatever assessment might be fixed thereon on a regular survey and settlement.

3. A valuation survey and classification of the village lands have already been made. But, however, in view to fix the exact assessment payable on the village, the Superintendent of Revenue Survey was requested to introduce a proper Revenue Survey and Settlement into the village, basing them on a new field measurement and classification in the event of the old valuation survey not giving proper bases for the settlement. Colonel Grant reports that the valuation survey and classification already made do afford sufficient bases for settlement, and has accordingly forwarded the Akarband of the village based on such valuation.

4. According to the Akarband above referred to, the village lands, which, exclusive of the village sites, roads, &c., measure 362 acres 27 guntas, are assessed at Rs. 594-8-0. This settlement is approved.

5. Of the assessed lands measuring 362 acres 27 guntas, 15 acres 30 guntas are Minor Inams as noted in the margin. Excluding these last, the assessment on the remaining lands will amount to Rs. 566 against a Jodi of Rs. 15 payable by the Matt to Government.

Shanbhog Inam ...	6	20	12	0	0
Brahmadaya ...	2	25	4	8	0
Total ...	15	30	28	8	0

6. Under the foregoing circumstances, the Government are pleased to accept Mr. Murray Aynsley's Darkhast, and sanction the whole of the lands of the Sanyasihalli village, with the exception of the Minor Inams adverted to in the foregoing para, being granted to him for cultivation on Shraya tenure, on the condition of his paying to the Matt an annual assessment on the lands at the rates specified below :—

For the 1st year of the grants	1894-95.....	4 annas	per rupee of assessment.
For the 2nd	ditto	1895-96..... 6 annas	ditto
For the 3rd	ditto	1896-97..... 8 annas	ditto

Late Chief Commissioner's Proceedings No. 8004—15, dated 10th December 1877, directing that the Muzrai stipendiaries should be warned that, if the stipends are left undrawn for more than six months, the payment of the arrears will not be allowed on the mere pretext of illness or other inconvenience and that such arrears will, except for very satisfactory reasons, be treated as cancelled.

Government Proceedings No. 101-14—Cir. 6, dated 25th April 1892, directing that no portion of the Napavati amount be appropriated for any purpose without the sanction of the Government in the Muzrai Department, and that all amounts of Napavati should be credited to the Treasury at the end of every month.

Letter No. 1388, dated 17th May 1895, from the Deputy Commissioner, Bangalore District, recommending that a time of three months may be allowed in future for the payment of the allowances of Muzrai stipendiaries.

No. 1136-44, DATED BANGALORE, 14TH JUNE 1895.

ORDER THEREON.—The Deputy Commissioner reports that most of the stipendiaries reside at a distance from the Taluk Head-quarters, and do not come to receive the small allowances every month regularly, that the allowances not disbursed to the parties during the month have to be credited to the Treasury, that when the parties appear later on, sanction of Government has to be obtained, and that this entails much correspondence; and consequently proposes that the present rule of crediting the allowances payable to Muzrai stipendiaries to the Surplus Funds at the end of every month be altered so as to provide the payment of the same within three months from which the same falls due.

2. On reference to the Register of Ready Money Inams, it is observed that the allowances payable to stipendiaries are comparatively small amounts, that most of the recipients live in out-stations, and that it is inconvenient for them to appear and receive their allowances every month regularly.

3. Under the above circumstances, Government consider that the period of six months allowed in the late Chief Commissioner's Proceedings No. 8004—15, dated 10th December 1877, for the payment of the arrears of allowances to the Muzrai stipendiaries is reasonable, and is in accordance with the Codal Rules now in force, and they direct therefore that the instructions laid down in the said Proceedings be duly observed in future.

Letter No. 424 of 5th October 1893, from the Deputy Commissioner, Mysore District, to the address of the Chief Secretary to the Dewan, regarding the restoration of the old feeder channel to the Kalale tank.

Also Mysore Division Executive Engineer's Camp No. 653, dated 12th June 1894.

No. 2792-5—370-3, DATED BANGALORE, 15TH JUNE 1895.

ORDER THEREON.—The raiyats holding land under the Kalale Chelvamba tank; Registered No. 15, in the Nanjangud Taluk, again complain bitterly of the chronic insufficient supply of water in their tank.

2. The improvement of the tank and its right feeder was taken in hand in accordance with a project sanctioned in May 1887 for Rs. 8,703. A revised estimate for Rs. 11,534 was sanctioned on 5th January 1891 and duly worked out, and on 8th August 1891, the Executive Engineer reported that the catchment area newly added to the tank by the works recently carried out amounted to *6 square miles and he advised that the result should be watched before undertaking any costly system of artificial feeding. During the years which have since elapsed, the tank which has a capacity of only 275 units with the large free catchment area of 22† square miles has however never filled not even in years of exceptionally heavy rainfall. This fact has been attributed to absence of tank filling rains in the locality, but the more probable reason appears to be that the greater part of the catchment area has come under cultivation in recent years and is inefficient from that cause. Whatever may be the cause, some remedy should be devised, as the raiyats are put to much real hardship owing to the insufficient filling of their tank during a long series of years.

*Note.—As corrected from Topo. map in Chief Engineer's office, 4·25 square miles.

†Note.—As corrected from Topo. map in Chief Engineer's office.

Free catchment ...	17·5 square miles.
Left feeder ...	1·0 ditto
Total ...	18·5 square miles.

3. As at present advised, the Government are of opinion that the best means of supplementing the supply is the execution of Hulhalli Feeder Project. This project as submitted to the Government in May 1887, was for enlarging and extending the short length of existing channel under the Hulhalli Anikat across the Gundal river, to connect this channel with the Bargur channel, now out of order, and by restoring eight miles of the latter channel to feed the Kalale tank. The estimate for this work submitted in 1887 was for Rs. 35,527; but it included some Rs. 9,000 worth of work (including four miles of the proposed feeder) which has since been carried out. This feeder project was ordered to be kept in abeyance partly because the cost was unduly high, and partly because the supply to the Narsambudi should not be reduced without further experience. The experience of the past several years proves that there need be no apprehension of any material reduction of the Narsambudi supply, and the Government accordingly is compelled to revert to the Hulhalli Feeder Project as the means of supplementing the Kalhalli supply. This project should be thoroughly investigated and submitted in due course for sanction. The occupied area reported in 1887 was about 73 khandies wet and 87 khandies garden, bearing a total assessment of Rs. 1,500. The Revenue Survey now in progress will probably show a larger actual area and correspondingly larger revenue. If the tank could be filled twice in the year, an additional area of 105 khandies of dry land could, according to the Deputy Commissioner, be converted into wet. The Executive Engineer's proposal was to irrigate 550 acres altogether under this tank, and as more than half the present cultivation is garden, an irrigable area of 550 acres is not an over liberal estimate. Moreover, the feeder channel can on its way to Kalhalli, supply direct irrigation to at least 150 acres of new land up to Chikkatte. The Executive Engineer estimated 500 acres under direct irrigation but the Gundal river cannot be depended upon for so much direct irrigation. During floods the channel can readily be used for filling the Chikkatte tank enlarged and the Sindvalli tank and finally the Kalale tank.

4. Under such circumstances, the Government are of opinion that the Hulhalli Feeder channel project will not only enable the Government to safeguard the present revenue from the Kalale tank, but also bring new land under irrigation say 150 acres up to Chikkatte.
100 acres under the enlarged Chikkatte tank.
150 acres under the Kalale tank.

Total ... 350 acres.

This area will give an additional revenue of at least Rs. 1,200 per annum which is a very good return on the capital outlay required of Rs. 25,000.

5. The project when carried out will give an assured supply to Kalale and the two other tanks. This fact and generally the details of the project should be communicated to the Superintendent of Revenue Survey under whom the classification of the Nanjangud Taluk is now in progress.

6. The project should be submitted for sanction at as early a date as possible.

The following Inspection Note dated, Bangalore, 11th June 1895, by Colonel C. Bowen, Chief Engineer of Mysore.

MYSORE-CANNANORE ROAD.

Mysore to Yelwal.—This section is not now budgetted for as part of the Mysore-Cannanore road which starts from Pakshivahini Railway Station, but it forms part of the main line to Coorg from Mysore City, which is complained of; so I include it in this report. The Public Works portion begins at 3rd mile, up to which it is a Municipal road.

Mere patchwork is required along the 4th and 5th miles, surface of which is breaking up in places, and shoulder drains require clearing. This patching can at this favorable time be quickly and effectually done.

The 1st furlong of 6th mile should be entirely recoated now. Metal has been collected for the purpose, and the sooner it is taken in hand the better.

Road then good to 6th furlong of 8th mile, which also should be entirely recoated. This work is not estimated for for this year (1895), but it must be done.

I must however modify statement that road is good from 6th mile to 6th furlong of 8th, by adding that recent patchwork is beginning to go to dust, from insufficient water and tamping. And drain clearing on part of 7th mile required; it was done neatly on one side of road but not on the other. Sufficient metal for usual petty repairs collected all along.

2. *Yelwal to Billikere.*—Mileage changes at Yelwal, where the Mysore-Cannanore road proper joins in. Yelwal is at 90th mile. From this to 1st furlong of 92nd mile the road is very good on the whole, though 7th and 8th furlongs of 91st had better be recoated. Metal for this is ready. Drains are clear, and petty patchwork here and there is all that is wanted.

Second furlong of 92nd mile—the patching done was not sufficiently rammed and watered. Portion, not the whole, of this furlong had better be picked up all across and reformed, instead of merely patching it.

I noticed about here that large unbroken stones had been used in the petty surface repairs. This is very annoying, so distinct are the standing orders on this subject. This section up to Billikere tank is on the whole very good—in fact I never remember it better—but 1st furlong of 93rd mile, 5th, 6th, 7th and 8th furlongs of 94th, and 5th and 6th of 97th should be recoated this year. Through village of Billikere itself the road is very bad, as it almost always is through such villages. I ordered the surface to be remetalled here from side drain to side drain, not for a width of 4 yards only.

3. *Billikere to Hunsur.*—First furlong of 100th mile should be remetalled. Stone is being collected, but is not sufficiently broken. Up to this from Billikere the road is absolutely good. Thence onwards road continues much the same, good and a fair selection has been made of the furlongs which should be recoated this year, they are (in addition to 1st furlong of 100th mile noted above) 3rd, 4th, 5th and 6th furlongs of 100th mile, 2nd of 101st, 8th of 102nd, 5th and 8th of 105th, and 1st, 5th and 6th of 107th. This amount of new full width coats will do for 1895-96.

I must note that the patchwork, a good deal of which has recently been done on these miles, is good, but more watering and tamping is desirable to prevent its being cut up and broken.

It is along this section, between Billikere and Hunsur, that four or five deviations have been made since the Rendition. These have greatly improved the gradients, and gave me the impression of a distinct improvement in the general character of this road. All the deviations are smooth and easy driving, though perhaps easier curves at some of the junctions with old alignment might have been effected.

At the 108th mile the road becomes Municipal, and here the surface is very dusty and broken. I will supplement our annual contribution this year to the Municipality which, I am told, is "hard up."

Up to Hunsur, on the Cannanore road, 937 cubic yards of metal have been collected since last November, and on 1st last month there were 1,737 cubic yards at road side (70 cubic yards go to a furlong, for a total recoat 3" thick). So the road so far has not been neglected and there is plenty of petty work now going on all along.

Several of the parapets of culverts by the way, are dilapidated and unsightly and should be seen to. They have not received attention for a long time.

4. *Hunsur to Periyapatna.*—110 to 122 mile. Opposite the stables on 110th mile should be entirely remetalled. 111th mile is fair enough all along, 7th and 8th furlongs (to be recoated) excepted, but on 3 furlongs some bad coating was done last year and is consequently being patched up. Several parts of 112th require recoats now. The *whole* of the 113th and 114th should be remetalled in the rains, the skin being worn down quite thin. The 3rd and 4th furlongs of 117th, and 3rd, 4th, and 5th of 118th require recoats badly. In fact the whole of the last mile, there being many holes and cross ruts, would be the better of remetalling. The drainage too about here requires immediate attention.

Up to 119th mile this section has evidently been rather starved, and a good deal more new coats than is provided in the estimate of next year (1895-96) are required. They will now be added. Drains too require much attention in places. The 120th and 121st in "toto," ought to be remetalled or they will soon go to bits, also some four furlongs of 122nd.

The embanked approaches to Hunsur bridge and to Periyapatna Kodi Nalla bridge had better be railed.

This section of 12 miles has *not* been sufficiently treated with full recoats in recent years. Too much reliance has been placed on patchwork. Of the whole 96 furlongs certainly about 50 now require entire coating, instead of the mere half-dozen estimated for. And in next two years the same proportion of recoats should be continued.

The patchwork of which much has been recently done is not sufficiently watered and rammed down. But, on the whole, although there is much unevenness on many of the miles, and consequent jolting for light quick spring traffic the road is not half so bad as it has been painted, nor do I see much difference, if any at all, between what it is now and what I remember it fifteen years ago.

5. *Periyapatna to Frazerpet.*—122nd mile to junction with Siddapur line, that is to 6th furlong of 124th mile, to be recoated by next October (if available labor can be found). Portions of these miles are good enough, but the crust is quite worn, section uneven and hollow in parts, and it is better to remetal the whole. Thence on to 128th mile, one furlong in each mile should be recoated in full this year if possible.

The 128th, 129th and 130th are on the whole excellent driving just now. Two furlongs of 132nd to 133rd, and same number of the 134th should be remetalled. The embankment at Chandanhalli is rather narrow and should be railed on the tank side. The estimate prepared for 1895-96 provides for remetalling 7th and 8th furlongs of 122nd, 3rd and 4th of 123rd, and 1st of 124th, five in all,—but this is not nearly enough. It should be modified as above, so far as labor available admits.

The returns show that since 1882-83, the number of furlongs recoated from end to end has been comparatively small, the road having been maintained chiefly by patching—"darning." Nevertheless, judging from what I saw and noted, the complaints that have reached me are, in my mind, distinct exaggerations,—resulting probably from rapid drives in light vehicles taken at a time after a long and severe drought when the surface of all roads must necessarily be "at their worst," and when repairs done to holes and ruts are rapidly ground to dust and the stones used in metalling get scattered all about.

6. *Periyapatna to Siddapur.*—On this branch 7 furlongs have been selected for recoat this year. The whole of the 129th mile should be added and the 5 furlongs this side of boundary. It is difficult to describe this road which all along is not good nor yet very bad. There are no perfect furlongs, no perfect mile, and the surface in very many furlongs is pitted with numerous small holes, "pock-marked," though there are no staring ruts nor very rough and "lumpy" patches anywhere (except the 129th and 130th miles which are in parts very uneven and much worn).

All this general condition arises from insufficient through recoats since the road was made. That is, too large a share of the allotments of Rs. 150 a mile, was given in each year to repairs and patching, too little to reforming full width with new recoats. It has been maintained in fact by the "darning" process: and whilst labor and materials are very expensive, the traffic has become, I am told, very considerable. (I may note here, *en-passant*, that the system of mixing up on some furlongs blue, black, and white (quartz) metal is, in my mind, responsible for some of the roughness and unevenness). Thus in 1892-93 there were but 4 furlongs entirely remetalled, in 1893-94 2 furlongs, in 1894-95, 5 furlongs and since 1882-83, when the line may be said to have been fully opened, only 65 furlongs in all have been so recoated. This for a new road of 46 to 47 furlongs, with gradually increasing traffic, and an original but thin coat (as was then the custom) over bad soil, was not a proper proportion. In fact since the Rendition every furlong ought to have been recoated twice by this time, more especially as the first thickness of metal had probably been but 4½ inches.

There is now at site sufficient metal for recoating the furlongs selected this year, *viz.*, 2nd furlong of 125th, 4th and 7th of 126th, 1st, 4th, 5th and 6th of 127th, but to these ought to be added the lengths I have noted above, and in same proportion ought to be the renewals of 1896-97 and 1897-98 and so on. This of course means a largely enhanced mileage allotment, but it must be remembered that whilst labor and materials are annually increasing in value, the traffic is also, I am informed, distinctly increasing.

7. From the above notes it is to be inferred that (apart from the comments of the Resident) the complaints which have reached the Darbar about the Mysore-Cannanore road are not altogether fair and reasonable. But they have been recently so marked, the expressions used officially so "strong," even officers of Mysore having expressed themselves "bitterly," I must search for some foundation. In the course of my inspection I found myself no occasion to be either strong or bitter. It lies then in the fact that in the season when the road recoats of last year were done, October to part of November, the rains were abnormally light and of short duration, resulting in imperfect and uneven consolidation. I must add that from perhaps an unwise though natural desire for economy, because of very long leads and expensiveness, the short rainfall was not properly supplemented by water carting. The result of this was that the fresh recoats got quickly broken up, gravel "blindage" went to dust, and metal got scattered loosely about. Then again the bad rains were followed by many months of dry hot weather which no road will stand, during which no surface will run well. The petty repairs, filling of holes and ruts, patching in bits, which go to maintain a road during such a period get ground to powder, and the surface generally becomes covered with dust, loose, uneven, and "bumpy". Let an Overseer, Mestri or gangman do what he can at such a time, he will give no satisfaction to those who go down the roads in light spring vehicles, more especially in two-wheeled ones. Rains make an immediate and vast difference in a road under continuous repair. It was after some seasonable rain I drove over this road and I certainly went along the whole way smoothly enough. I do not forget that a jungle road some 55 miles long is not a "park drive", nor yet an urban or suburban "avenue" as some seem to think all our district roads ought to be; and I keep in mind that the funds available for the reasonable maintenance of a great net-work of roads of all sorts are limited, and that such roads are primarily made and have to be maintained for the traffic of the country, the common "bandy," not for dog-carts and tongas (much as I would personally wish to have them so made and maintained).

In the complaints then there is (or was—I learn they have been modified since) this amount of justice, that the Executive Engineer and his subordinates did not grapple with an unusually bad road season to the extent necessary to ensure the smooth running of quick traffic in a period of long drought. To do so would have, in his opinion, entailed too heavy outlay. I will add, in his justification, that he applied to me last year for an enhanced allotment for this Madras-Cannanore road, and I promised to give him a substantial increase this year.

In conclusion I would remark that, if the traffic has of late years increased so greatly as is alleged, it is distinctly creditable to all concerned that the road is now in the general condition in which I found it. One gentleman, for a long time intimately connected with Hunsur, assured me recently that through and from the town of Hunsur itself the number of carts passing had increased 100 per cent since 1885-86. He knew it "as a fact". This speaks for continuous creditable up-keep of the road for 10 years, not for neglect or disregarded deterioration.

It must not be taken from what I have said above that I am defending all back-slidings or shortcomings of the Public Works staff in connection with our roads. Too often and too strongly have both myself and my Assistant to condemn our road repairs,—to find fault with slipshod work, more especially and more continuously with bad consolidation and scamping of water, rollers, and tampers. But in this particular instance I must plead on behalf of the few immediately concerned with the charges, that too scanty allowances have been made by the public for the difficulties of the situation, the circumstances of place and time.

No. 2821—382, Dated Bangalore, 17th June 1895.

Order thereon—The Government have given their best consideration to the Inspection Note read above, and resolve to sanction for execution forthwith the various works therein reported as necessary. It is noted that for some of these works the Chief Engineer has already issued instructions, and for the others the additional Budget provision required will be sanctioned from the Annual Public Works Department Budget grant, supplemented by the realizations from the Tolls on the roads in question. The whole of the works should be at once taken in hand pending formal sanction to the estimates to be submitted in due course for each of the roads in question.

2. The mistaken economy which led to insufficient watering of portions newly repaired during the last exceptionally dry season should be avoided in the case of the repairs, patchwork or recoating, which are now in progress or are hereafter to be undertaken. Water carts should be employed when and where necessary, and in all new work thorough consolidation should be aimed at. "Patching," where likely not to prove effective, should be avoided; and in all such cases "recoating" though more costly should be resorted to as economical in the long run. It is noted that the new Siddapur Branch (nearly 6 miles) opened for

traffic in 1882-83, has not received the attention that a new road in this situation demands. This should be remedied forthwith by recoating with metal during the approaching rains, not only the seven already selected furlongs and the now recommended 129th mile and five furlongs from the boundary, total twenty furlongs, but also such other furlongs as may be found to be unsuitable to be dealt with by the "darning" process. The special allotment required for this work will be provided in the Budget for 1895-96, as it is better to do all this work as far as possible during 1895-96, rather than spread it over 1896-97 and 1897-98 as well.

The following Note by Chief Engineer, dated 25th March 1895, on the Final Issue of Budget Estimates of the Public Works Department for the year 1894-95.

The above Budget estimates, herewith submitted to Government for sanction, provide for a total expenditure of Rs. 32,09,499, which is Rs. 38,134 more than the original grant, as shown below. Of this increase, Rs. 36,634 is due to the supplemental grants subsequently sanctioned by Government in General Department from District Funds, and the balance Rs. 1,500 is the additional sum required for Palace works.

			Preliminary Issue.	Final Issue.
			Rs.	Rs.
Provincial Fund	...	...	25,00,000	25,00,000
District Funds	...	...	3,76,865	4,13,499
Irrigation Cess Fund	...	...	2,84,000	2,84,000
Palace Fund	...	...	10,500	12,000
		Total	31,71,365	32,09,499

PROVINCIAL BUDGET.

2. The original grant of 25 lakhs sanctioned from Provincial Revenue under this Budget stands good; and its distribution to the several service heads, given in abstract pages 2 and 3, has been made according to requirements as reported by the Divisional Officers.

ORIGINAL WORKS.

3. Under "Military," a reduced grant of Rs. 72,000 has been provided against one lakh entered in the Preliminary Budget. The project for the construction of lines for Imperial Service Corps and transport Service being in abeyance on account of the site not having yet been acquired, the original allotment of Rs. 50,000 has been cut down to Rs. 10,000, which sum is entered in case this work is taken in hand before the close of the year. If more money be required, it can be provided by re-appropriation. The work of constructing stalls in the new sick lines at Mysore, for which Rs. 3,000 were provided in the Preliminary Budget, has been omitted, as the question of site now under the consideration of the Military Secretary, is not likely to be settled before the close of the year. The construction of quarters for officers of Barr Regiment at Bangalore, for which Rs. 5,000 have been provided, is a new work not previously provided for but taken in hand on the representation of the Military Department that it was urgently necessary.

4. Under "Civil Buildings," an original provision of Rs. 2,50,000 remains unaltered; but the allotments for individual works have been modified at the

request of the Executive Engineers to meet actual requirements. Provision has now been made for 17 incomplete works of the previous year not provided for in the Preliminary Budget, and for 5 new works since sanctioned.

The provision made for the marginally noted works in the Budget has been omitted. The 1st and 2nd works have been ordered to be held in abeyance for the present; 3rd and 5th works could not be proceeded with owing to non-recovery of Municipal and District Fund contributions for them; and the 4th work had to be abandoned as there is some difficulty in acquiring the additional land required to be added to the compound of the High School. For minor works of this class, a Reserve grant of Rs. 47,500 was originally provided; but this having proved insufficient, it has been augmented by Rs. 6,800 to provide for urgent works already sanctioned.

(1) Constructing General Hospital at Bangalore.
(2) Constructing out-houses to Public offices at Mysore.
(3) Constructing Female Dispensary at Kolar.
(4) Constructing compound wall to Government High School at Tumkur.
(5) Constructing Female Dispensary at Shimoga.

5. *Irrigation.*—Of the sum of 10¾ lakhs allotted under this head, Rs. 3,95,000 have been absorbed by the marginally noted special works now in progress. The balance of the grant is required for finishing off as many as possible of the large number of incomplete works of previous years, in view of the reduced Provincial grant, which comes into effect from 1895-96. 28 additional incomplete works omitted in Preliminary Budget have now been provided for at the instance of Executive Engineers. The original grant of Rs. 39,000 reserved for minor works under this head has been reduced to Rs. 3,000, which amount is considered sufficient under the arrangement now in force of sanctioning all unremunerative minor irrigation works from the Irrigation Cess Fund.

	Rs.
Improving Hessarghatta tank ...	2,00,000
Constructing Marikanave tank ...	20,000
Improving and extending Hulhalli channel	1,00,000
Alalkatte right bank channel ...	45,000
Saligram R a channel	30,000

6. Under "Original Communications," the grant has been increased from Rs. 1,60,000 to Rs. 1,93,000, the increase being necessary to meet the actual requirements of the several incomplete works in progress. An allotment of Rs. 6,000 has been provided for the construction of "Courpalais Chattram" at Shimoga, the Government having consented to contribute that amount for the thorough completion of the work, the difference Rs. 40,000 having been paid by the donor, Mr. Courpalais. Provision has also been made for metalling the Maddur-Sivasamudram and Cauvery falls road (Estimate Rs. 8,483); and for a cart-stand near Kadur Railway Station (Estimate Rs. 6,320) sanctioned from Provincial Funds as a special case, with the permission of Government. The sum of Rs. 7,000 provided for the Bhadra bridge is required to close the accounts of that work, which has already been completed.

7. *Miscellaneous Public Improvements.*—The grant under this head has been reduced from Rs. 46,000 to Rs. 24,000. The large difference is chiefly due to the provision made for the "Lansdowne Bazaars" at Mysore having been reduced from Rs. 25,000 to Rs. 10,000 which is found sufficient to meet this year's outlay. The allotments for the other works have also been modified according to requirements. Provision has now been made for railing the crossings of Viceroy's and Jubilee roads near the Kukarhalli settling tank, for which an estimate of Rs. 3,970 has since been sanctioned.

REPAIRS.

8. The grant under this head, namely, Rs. 3,88,000, is the same as that provided in Preliminary Budget. Rs. 5,000 have been allotted under Military, Rs. 63,000 under Civil Buildings, Rs. 3,15,000 under Communications, and Rs. 5,000 under Miscellaneous Public Improvements. The original provision under Civil Buildings has been increased by Rs. 3,000 by transfer of that amount from Communications.

DISTRICT FUND BUDGET.

9. The grants sanctioned by Government in the General Department for works to be executed by the Public Works Department aggregate Rs. 4,13,499, against Rs. 3,76,865 provided in the Preliminary Issue. The difference is due to supplemental grants given for the Districts of Kolar, Tumkur, Chitaldrug, Mysore (French Rocks Sub-Division) Shimoga and Kadur. The distribution of the grants by service heads is given in pages 8 and 9 of Budget.

IRRIGATION CESS FUND.

10. The grant under this Budget has been fixed at Rs. 2,84,000 as per Preliminary Issue, that amount being the estimated assets at credit of this Fund at the commencement of this official year. The system of making grants-in-aid from Provincial Funds to this fund (hitherto called "Provincial Irrigation Fund") having been abolished under orders of Government, the Irrigation Cess Fund is now being spent only on the following class of works:—

(1) Restoration of Irrigation works to secure present revenue,
(2) Repairs of Minor Irrigation works, the earth work of which is done by raiyats,
(3) Annual maintenance of river channels, and
(4) Maintaining of the establishment of Tank Inspectors.

Of the grant of Rs. 2,84,000 referred to above, Rs. 90,000 have been allotted under Original Works, Rs. 1,82,000 under Repairs, and Rs. 12,000 under Establishment to cover the cost of Tank Inspectors employed in connection with the Minor Tanks Restoration Scheme.

ESTABLISHMENT.

11. The total charges under this head aggregate Rs. 5,60,000, against Rs. 5,51,000 provided in the Preliminary Budget. The excess is partly due to the provision made for the increased salaries of the Chief and Assistant Chief Engineers, and partly to a few additional Assistant and Sub-Assistant Engineer having been entertained since the original Budget was framed. The details regarding establishment will be found in part 3 of Budget. The establishment charges are 17·5 per cent on the total grant of Rs. 32,04,089, or 21·2 on grant for works alone. The distribution of the charges to the Provincial and District Fund Budgets is Rs. 4,77,421 and Rs. 70,579 respectively.

PALACE FUND.

12. The original grant of Rs. 10,500 has now been increased to Rs. 12,000, in order to provide for the improvements to the Private Secretary's Bungalow at Bangalore since sanctioned.

GENERAL REMARKS.

The Mysore Special Improvements Division has been amalgamated with the Mysore Division, and a separate Division formed under Mr. Mahadevasastri, Executive Engineer, for carrying out works in connection with the extension of Cauvery Irrigation in the Mysore District. An independent Range has also been formed under Mr. Raghavalu Naidu, Executive Engineer, for the investigation of the Marikanave Project in the Chitaldrug District.

Government Proceedings No. 1925-29—320-24, dated 6th May 1893, para 5, ordering that for the supervision and, when necessary, execution by the Sanitary Engineer, of minor works in the various Municipalities sanctioned from Municipal Budgets, a moderate charge of 10 per cent on the actual cost of such works may be recovered from the Municipalities concerned, and credited to the Public Works Department, also para 6 of same Proceedings stating that separate orders will be passed as regards debit of establishment charges on account of grant-in-aid works, after some experience of the present system.

2. Government Proceedings No. 3916-36—749-69, dated 1st August 1894 (clause 2), ruling that for purely Municipal works entered in para 2, the supervision and control of the Sanitary Engineer is to be free of charge to the Municipalities concerned.

3. Letter No. 155 of 23rd August 1894, from the Sanitary Engineer with Government, submitting certain proposals in regard to debit of certain establishment charges for 1893-94.

4. Public Works Secretary's Memo, dated 4th October 1894 to the Dewan, requesting orders (1) as to whether establishment charges are to be debited proportionately to the grants allotted for Parts I and III of Sanitary Works Budget, or only to Part I, and (2) whether such charges should be recovered from the Municipalities concerned, in addition to the loans granted to them; and suggesting that Government might well relieve Municipalities of these establishment charges, being interested as they are in the spread of sanitation and willing to afford help to institutions as yet but in their infancy.

No. 534-57—3131-54, DATED, BANGALORE, 25TH JUNE 1895.

ORDER THEREON.—Under the circumstances represented in P. W. Secretary's Memo referred to above the Government is pleased to order that Municipalities be relieved of establishment charges for works included in Parts I and III of the Sanitary Works Budget as well as for purely Municipal works entered in Part II as already ordered in Proceedings No. 3916-36—749-69, dated 1st August 1894.

Tumkur Division Executive Engineer's report on the project for constructing a new Reservoir across the Garudachala River at Mavatur, Tumkur Taluk, submitted with his No. 332 of 7th September 1893:—

This is an estimate for constructing an entirely new tank across the Garudachala river near the village of Mavatur, Tumkur Taluk.

2. The catchment is 93 Sq. miles with very few and those too very small tanks in it. The total area of the water spread of these small tanks is 201 acres. Taking 2½ ft. as average depth, their capacity may be taken to be 125 units.

3. The rain-fall in this area is known to be very good. That for a year of average rain-fall may be taken to be 36 inches. Supposing that 4 inches of this drains into the tank we get 36 × 93=3,348 units available for storage. Deducting 125 units stored in the upper tanks, there remain 3,223 units for storage in this reservoir. The capacity of the tank is proposed to be 2,616 units of which 133 units will be below the sluice level.

4. Mode of carrying out work proposed: From the accompanying statement and block plan sheet No. 7 it will be seen that the average lead of earthwork is 250 yards and lift 10·07 yards. The lead being not great, carts and buffaloes carrying earth on their back will suffice for this work. Light rails and waggons will, perhaps be not required. The earth available is all red earth and gravel. Four annas per c.yd. of earth work is provided. The first thing that will be done is the raising of bund which will be commenced simultaneously (if sufficient labor is available) from both sides of the stream, *i. e.*, from C. S. 7 and C. S. 11. On both these sides centrifugal pumps to supply water for watering and tamping will be placed. The level to which water will have to be delivered will be raised from time to time as the bund progresses. The bund from C. S. 1 to C. S. 7 and from C. S. 11 to C. S. 16 will thus be raised to R. L. 55·00 and then stopped. A gap 100 yds. wide will be kept between C. S. 14 and 15 for reasons given further on. While the above work is in progress the bed of river (C. S. 7 to 11) will be cleared of silt, sides stopped and masonry walls ordered in para 6 of Chief Engineer's No. 331, dated 17th February 1893 built.

5. Bund from C. S. 1 to 7 and 11 to 16 up to R. L. 55·00 costs Rs. 1,31,039. The two sluices cost Rs. 8,736. These two works will take 28 months to do at Rs. 5,000 per month.

6. In the month of January just after these works are completed the filling of nala from C. S. 7 to 11 will be commenced. As the foundations must have all been examined and stopped in the previous dry season, all that will be required is to clear such silt as may have since come, to pump out water and put in puddle and then go on with earth filling. We might do the bottom filling too in the previous season, but the slope of the nalla is so great that I am afraid all that we do will be washed away. The filling shall have to be brought up to R. L. 55·00 in one season. To allow the Mungar (South-west monsoon) rains to flow away, I propose keeping a gap 100 yds. long between C. S. 14 and 15. Its bottom will be at R. L. 20·00. The site is fairly rocky. After the bund across the main nala is raised to 55·00 this gap will be closed and floods passed on the rock from C. S. a to C. S. e. This will be done before July or August. The work of filling the gap proposed to be kept at the site of the main nala up to R. L. 55·00 and the temporary gap comes to Rs. 81,276 and this shall have to be done in 7 or 8 months. Once the water passes on the rock from C. S. a to C. S. e. which is on saddle, our difficulties are fairly over. The rock there is at R. L. 42·00 and can be lowered to 40·00. This rock is on saddle and water will discharge into the adjacent valley.

7. After water passes over the rock I would resume the further raising of the bund from C. S. 1 to C. S. 16 and complete it to the section required.

8. The bund from C. S. 16 to weir will then be done by excavating earth for Kodi cutting and water turned on to the proposed Kodi.

9. When raising bund up to R. L. 55·00 care will be taken to exhaust all earth available on bed side before earth is excavated in rear side. For filling the centre nalla however, earth shall have to be excavated both in rear and bed simultaneously in as many places as is possible. The earth in pit No. 17 in bed may not be fully exhausted before the tank receives water. To provide for this contingency I have provided 1½ yds. instead of 2 yds. for the depth of pits required for filling nala—*vide* lead and lift statement. I propose paying the contractor for earth work by sections of work turned out and not by pit measurement as evidently this is the safest course for checking measurements.

10. The top soil will be removed from over the whole site of the bund as ordered in para 3 of Chief Engineer's order quoted above. This will be stacked in rear of bund in the margin of 20 yds. that will be left from toe of bund to commencement of pits. This earth will again be used for top of bund. 5½ annas per c.yd. have been provided for this earth work namely 0-2-6 for excavation and putting on the margin and 0-3-0 for replacing it on top of bund.

11. The front and rear slope of bund will both be 2 to 1. The revetment will be 2½ feet thick, measured at right angles to slope. The gravel packing behind revetment will be 1 ft. at right angles to slope and will be watered and rammed. The top of bund will be gravelled and earthwork slopes turfed.

The revetment stones will all be laid at right angles to slope. The stones will be 1½ to 2 ft. long and the remaining thickness will be of small jelly. The stones will be obtained from hills with an average lead of 2 miles. The rate of Re. 1 per c.yd. will suffice for stones on the surface but if stones are to be blasted Rs. 2½ will be required.

12. For the clearing of silt from bed of nala a rate of 0-2-6 is provided per c.yd. Rs. 1,000 are provided for removing soft rock and benching the sides of nala and Rs. 1,500 for baling water. Two per cent. of the estimate is provided for unforeseen contingencies, 2 per cent. for repairs during execution and 1 per cent. for machinery and tools required for pumping, &c.

13. *Sluices.*—The capacity of the tank is 2,483 units above sluice level. There will be 2 sluices one on each side of the valley. Both will be at R. L. 30·00, the quantity of water left in the tank below that level being only 133 units. The left channel will be 7 miles long and will irrigate 2,027 acres of the following villages :—

Name of the village.	Tenure.	Acres.
Mavatur	Sarkar	106
Madya Venkatapur	ditto	618
Bhakturhalli	ditto	177
Budmaranhalli	Jodi	779
Mallenhalli	Sarkar	347
Total ...		2027

14. The right channel will be 7 miles long and will irrigate 1,203 acres of the following villages :—

Village.	Tenure.	Acres.
Mujara Hosahalli	Sarkar	27
Mavatur	ditto	39
Chilanhalli	ditto	184
Madya Venkatapur	ditto	123
Chiksagara	ditto	220
Hodsagara	ditto	122
Palenhalli	ditto	28
Obla Devarahalli	ditto	50
Alpanhalli	ditto	289
Agrahara	ditto	122
Total		... 1,203

15. Both the sluices are designed of the same pattern. The tunnel will be 3′×3′ which will admit of a man going in it in a sitting posture. The side walls will be of brick in surki 2½ ft. thick and a semi-circular arch will be turned over them. As an additional precaution, slabs 6″ thick will be put over the vent and the semi-circular opening closed with masonry. Collars will be given one at every 10 ft.

16. *Head.*—There will be no lower orifices. The upper orifices will be 4 in number and 1½ ft. in diameter for the left sluice which has to irrigate 2,027 acres, and 2 orifices of 1½ ft. for the right sluice which has to irrigate 1,203 acres.

17. The uprights will all be of brick in surki circular pillars as shown in plan. The orifices will be worked by the usual lifting gear from the platform at the top of these pillars. The platform will be connected with the bund by a bridge as shown in plan.

18. *Distribution.*—The usual discharge statement is appended. The fall of the channel is 3 ft. The channel will run 4 to 2 ft. deep. A rate of 0-3-0 per c.yd. is provided for excavation as rock may be met with here and there. In a few places the channel will go in embankments for short length. To estimate for that in detail, I have no levels of the ground along which the channel will run. I have therefore provided Rs. 500 under each channel for embankment. Mangalore pipe sluices and waste weirs have been also provided for, as also compensation for land required for cutting channel.

19. The right channel will require 5 aqueducts for crossing cross drainages besides one for crossing the Kodi nala, and the left channel will require 3 aqueducts for crossing the cross drainages. The area of water way required for all these aqueducts except that across the Kodi nala is calculated in statements accompanying the project, and detailed estimates given. For the aqueduct across the Kodi nala it is impossible to estimate now. The nala must be formed and nature of soil ascertained before anything can be done. Rs. 3,000 are therefore provided in lump sum.

20. *Weir.*—The catchment is 93 Sqr. miles. The maximum discharge in c.ft. per second from it (supposing there to be no tank to act as moderator) is equal to $825 \times 93\frac{3}{4} = 825 \times 30 = 24{,}750$ c.ft. per second. With 3 ft. flood over weir, this will require a weir length of $\frac{24750}{18} = 1{,}375$ ft. As, however, there is a tank to act as moderator a weir 1,000 ft. in length has been provided. It will be seen from the levels that to get this length I have to go in for a cutting of 19 ft. at the highest ground.

21. Of this length of 1,000 ft. 325 ft., will consist of a masonry dam on rock and the remaining length will be a natural weir. All the earth excavated to form this weir will be carted to form the bund from C. S. a to C. S. 18. As however, earth below 2 yds. will be very hard and rocks and boulders may be met with, 0-4-0 per c.yd. are provided under weir for all excavation in excess of 2 yds. in depth. Whether any masonry work will be required for this natural weir, cannot now be said. None is provided for.

22. *Compensation.*—The construction of the tank will submerge 881 acres of dry land some of which is lying waste. Compensation is settled at Rs. 6,502—*vide* papers received from the Deputy Commissioner and attached to this.

23. *Contribution by Raiyats.*—This is settled at Rs. 43,690 by the Deputy Commissioner—*vide* papers received from the Deputy Commissioner and attached to this.

24. *Bungalows.*—Rs. 871 are provided for an inspection lodge and Rs. 500 for a lodge for Assistant Engineer or Upper Subordinate and Rs. 1,400 for Sub-Overseers, writers and peons.

I propose to cover the principal buildings with Mangalore tiles on teak wood work. The doors and windows will also be of teak. The walls will be of rough stone in mud.

25. *Returns from the Work.*—The cost to Government after deducting contribution is Rs. 3,02,533. The increase in revenue will be Rs. 8,193 as per Deputy Commissioner's No. 477, dated 16th April 1893. The percentage of profit is therefore 2·7. For 3,230 acres an increase in revenue of Rs. 8,193 only is provided. This is at the rate of Rs. 2½ per acre which is low. The returns are low on this account. This is very little, but for irrigation works we must take the value of crop raised year after year by the aid of this tank water. If this is taken into consideration the cost will be recouped in 2 years, supposing the value of crop raised on an acre of land to be worth Rs. 50. The waters of the river are now going to waste. There are not many such promising projects in the country. It is hoped therefore that this project which is in correspondence for the last 5 years will now at least be sanctioned. If sanctioned, a first class contractor who has actually carried out any large tank work in Madras Presidency should, I think, be imported, failing which, the work should be done as at Borankanve by Amani, an Assistant Engineer being specially posted and large advances given by Government to the work people.

---

2. Officiating Chief Engineer's report dated 14th March 1894 :—

The question of utilizing the Jayamangala and Garudachala streams in the Tumkur District,—which now runs to waste,—for the purpose of developing irrigation, has been under consideration for some time past. It having been decided that this object can best be attained by the construction of one or two large reservoirs across the streams as a preliminary to building anikats further down to feed tanks, projects were proposed for three large reservoirs : (1) at Sampiganhalli across the Garudachala, (2) at Mavatur across the same stream, and (3) at Iraksandra across the Jayamangala river. Colonel Bowen, finally abandoned the last project, namely, Iraksandra, as he did not like the site, and the alternative of restoring two smaller breached tanks above, namely, the Thanganhalli and Nagenhalli, has since been sanctioned. The Sampiganhalli project worked out to nearly two lakhs, and it will be seen from Colonel Bowen's note of the 29th November 1890, that he considered this project the best on account of the favorable site for weir, but he had not then seen the Mavatur site, and there is nothing to show that the site for the weir at Mavatur is any worse than that at Sampiganhalli. It has since transpired that there is a serious hitch in the contribution question at Sampiganhalli, as the Inamdars will not use the water at all for their 1,100 acres, and only some holders of 267 acres of Government land are willing to pay.* On the other hand, the raiyats under the Mavatur tank are willing to pay contribution for over 1,000 acres of dry land converted to wet, and the Revenue officers prefer this site, as compensation for submerged lands and villages will be much smaller than at Sampiganhalli.

* *Vide* Deputy Commissioner's No. 69, dated 20th May 1891.

II. About a year ago, I inspected the site at Mavatur, and as I considered it an excellent one for a reservoir I gave instructions to Executive Engineer for the preparation of a project. He has accordingly submitted a project, which amounted to Rs. 3,49,419; but after careful examination in this office, it has been considerably modified, without impairing its efficiency. The chief alterations are, (1) the height of bund and revetment above weir level, fixed by Executive Engineer at 16 and 10 ft., has been reduced to 12 and 8 ft., respectively, which is sufficient for a tank with only 889 acres of water spread. Allowing for a discharge of 4 ft. over weir, there will still be a good margin of 8 ft. to top of bund, and 4 ft. to top of revetment. If further protection is considered necessary hereafter, a jack bund can easily be thrown up in front. (2) The front slope has been reduced from 2 to 1 to 1½ to 1, the latter slope is allowed for many of the largest tanks in the Province, and has been found to answer. (3) The length of weir has been reduced from 1,000 to 700 ft., which should be sufficient for a discharge with 4 ft. head; but before it is adopted, Executive Engineer will be directed to ascertain by trial pits if rock is available and at what depth, as it is necessary that there should be no doubt about the soil for the weir in so important a work. These modifications have reduced the project to Rs 2,81,928, of which the Government share comes to Rs. 2,37,091, the raiyats having agreed to an acreage contribution of Rs. 44,837.

III. It is reported that the rain-fall in this area is known to be good, and the tank may therefore be expected to fill in average years. From the total drainage area of 93 square miles (of which 73·6 is independent catchment), 3,000 units may be counted on, and the capacity of the tank at R. L. 62·00 will be 2,766 units, which will suffice for the irrigation of 3,230 acres. But from this area must be omitted for the present, 780 acres proposed to be irrigated in the Jodi village of Budihanahalli under the left channel, as the Jodidar refuses to contribute and says he does not wish to convert his dry land into wet. This difficulty can probably be overcome by the extension of the right bank channel to enable it to irrigate 780 acres of additional land ; the matter has been referred to the Executive Engineer and his answer is awaited. The omission of these 780 acres, reduces the area to be irrigated to 2,450 acres, which is expected to give an increase in revenue of Rs. 10,671, and this represents a return of 4½ per cent on the Government share of the proposed outlay. The lands commanded by both the channels are said to be rich and fertile.

IV. Some 800 odd acres will be submerged by the construction of this tank, and the contribution fixed by the Revenue Department for the lands in holding is Rs. 6,502.

V. I strongly recommend the project for the favorable consideration and early sanction of Government, as the proposed reservoir will be of immense benefit to a large area of country,

and add materially to the prosperity of the people, though the anticipated return of 4½ per cen on the outlay is not high. There is an allotment of Rs. 10,000 for the work in current Budget

VI. The work is not barred by the Rules with Madras.

Dewan's remarks thereon, dated 13th April 1894.

1. I am not satisfied with the revenue prospects of this work. Please send me the fol lowing papers, with any others bearing on the subject.

(1.) Papers showing how acreage contribution is fixed. See Executive Engineer's para 23

(2.) Deputy Commissioner's letter No. 477, dated 16th April 1893, referred to in Executive Engineer's para 25. How did you calculate Rs. 10,671 ?

2. That the Inamdars don't want the water is very strange Is irrigation not appreciated in this part of the country ? Is it in this respect so very different from the neighbouring por tions of Kolar District ? There is something wrong here. I am enquiring into it in the Revenue Department, but please send me all that the Deputy Commissioner has said on the subject.

3. Also all Deputy Commissioner's reports for or against this particular project either to the Chief Engineer or the Executive Engineer.

As noted in your Memo—

4. Has Executive Engineer reported about R. channel, being extended to command an addi tional 780 acres ?

5. Has Executive Engineer tested site of waste weir ? Nos. 4 and 5 may at once be done meanwhile I will decide finally about the works on receipt of above information.

Public Works Department, Officiating Secretary's note, dated 18th June 1894.

I beg to resubmit the project of Rs 2,81,928, for the construction of a new tank near Mava tur in Tumkur District, with the particulars called for in your remarks of the 13th April 1894.

II. Para 1 of your remarks.—Deputy Commissioner's No. 127, dated 21st September 1893 and No. 303 of 3rd February 1894, which are put up, give the following particulars :—

Revenue.

		Rs.
1.	Conversion of dry land now in holding into wet	1,306
	Acres at Rs. 5 per acre	6,530
	Deduct present assessment	821½
	Total ...	5,708½
2.	Dry land not in holding to be converted into wet	828
	Acres at Rs. 5 per acre	4,140
	Deduct dry assessment	305
	Total ...	3,835
	Grand Total ...	9,543½
3.	Futher revenue as reported in Deputy Commissioner's No. 303, dated 3rd February 1894	1,128
	Total Revenue ...	10,671½

Contribution.

Deputy Commissioner in No. 477, dated 16th April 1893, reported that he expected contri bution : —

		Rs.
1.	From lands in holding	27,180
2.	From fields now lying fallow that may be taken up	16,510
	Total ...	43,690
	Further contribution *vide* Deputy Commissioner's No. 303, dated 3rd February 1894	1,147
	Total Contribution ...	44,837

III. Para 3 of your remarks.—All the letters addressed by the Deputy Commissioner to this office, or to the Executive Engineer, regarding this project, are submitted.

IV. Para 4 of your remarks.—The Executive Engineer reports that the right channel has already been traced for 7 miles, up to the boundary of Inam and Jodi villages ; and that if it is extended, it must pass through 3 or 4 Jodi and Inam villages, before Government lands can be irrigated. He therefore considers it useless to extend this channel, and suggests that if the sur plus water is let into the halla, it can irrigate 1,000 acres of dry lands under the pakka and which is built at Holavanhalli to feed the Rampur tank. As this channel also passes through Inam land, we must either (1) reduce capacity of the proposed tank, or (2) extend cultivation under anikat at Holavanhalli, and leave tank as designed.

V. Para 5 of your remarks.—There will be no difficulty about site for escape. I put up Executive Engineer's No. 196, dated 5th instant, reporting that trial pits have been excavated at

site of proposed weir at every 50 ft. and enclosing a statement giving results. As rock is now shown at so low a level, it would probably be advisable to lower the proposed weir by 4 ft., which will reduce capacity to 2,000 units. This reduced capacity will suffice for the 2,450 acres proposed to be irrigated, excluding the 780 acres under the left channel.

Tumkur Deputy Commissioner's letter No. 127, dated 21st September 1893 to the Chief Engineer of Mysore.

With reference to your letter No. 4170 of the 19th instant, I have the honor to state that 1,306 acres of dry land now in holding will be converted into wet by the construction of the proposed tank. Wet assessment on it at Rs. 5 per acre comes to Rs. 6,530. Deducting the present dry assessment thereon which is Rs. 821½ the net increase is Rs. 5,708½ (but not Rs. 4,358½ as stated previously.) Further, about 828 acres of land not in holding will be brought under wet cultivation. Wet assessment on it at Rs. 5 will be Rs. 4,140. Deducting the present dry assessment on it, which is Rs. 305 the net rise will be Rs. 3,835. Thus the total rise in revenue will be Rs. 9,543½.

Tumkur District, Deputy Commissioner's letter No 303, dated 3rd February 1894 to the Executive Engineer, Tumkur Division.

With reference to your letter No 1574 of the 10th November 1893, I have the honor to state that the Jodidar of the village of Budamarnalialli, is not willing to take water from the tank proposed to be built at Mavatur, and convert his dry lands into wet. Excluding his lands the rise in revenue on the remaining lands mentioned in your letter under reply will be about Rs. 1,128 and the contribution thereon Rs. 1,146-12-0.

Dewan's note, dated 6th December 1894.

I have studied this project very carefully and had also an opportunity of discovering some of its details with Mr. Halal. On the whole I am inclined to sanction it. It is a large one and I would like to have the benefit of your own opinion before arriving at a final decision either way. Please return the file with a brief expression of your own opinion.

Chief Engineers' report, dated 12th December 1894.

In your endorsement of 6th instant, on the papers, you ask me for a brief expression of my opinion on the project. After studying the reports, plans, &c., I have to say that the project is a good one, will be fairly remunerative, and will be indirectly beneficial in many ways.

There are a few engineering details in the plans and estimate as sent up I may like to have modified, after further consideration and enquiry, but this need not delay sanction. I refer for instance to the design for sluice, the reduced length of waste-weir (an important point), some of the rates, &c.

A few years ago I had myself decided on the Sampiganhalli site, on the same river, as the best place for a new tank. That project fell through mainly because of the preference of the Revenue officers for the Mavatur site, and the alleged refusal of the Inamdars, who hold 1,100 acres of the land commanded, to take water and of course to contribute.

It appears, however, that below the Mavatur tank there are 808 acres of Jodi land. The Jodidars too don't want water, but Deputy Commissioner reports that they will irrigate 50 acres at first, and will gradually bring all their lands under irrigation. But surely the Inamdars below Sampiganhalli would do the same. Given a flowing channel above their fields, I have no hesitation in saying that they would very soon come to terms for the water. So the alleged advantages of Mavatur over Sampiganhalli sites, do not "hold water," and the Sampiganhalli tank was estimated to cost Rs. 2,09,000, as against Rs. 2,-2,000, for Mavatur—so far as the irrigable land part of the question goes.

Compensation for land to be submerged is certainly entirely in favor of Mavatur. For Sampiganhalli, it was to be about Rs. 13,000. for Mavatur 6,000 or so. Unless the Sampiganhalli submerged lands are Inam, I cannot account for this. Judging from descriptions of the places, I should have thought the difference would be the other way.

But the alleged advantages on the site of Mavatur, taking together contributions, irrigable lands and compensation for swamping, are not equal to the excess of one estimate over the other, Rs. 80,000. Probably the Sampiganhalli estimate if worked up in close detail, would come to a good deal more than Rs. 2,00,000, but that I cannot speak to from the papers.

Apart from all this I would recommend the Mavatur project as it stands.

No. 517-20—3055-8, DATED, BANGALORE, 21ST JUNE 1895.

ORDER THEREON.—Final orders on this important project for a large tank at Mavatur had been reserved with the object of deciding on the relative claims of this work and another alternative work, namely the Sampiganhalli tank, and also for the purpose of ascertaining more fully through the revenue authorities, the revenue prospects—after due consideration the Government decide that the Mavatur project (the one now under immediate consideration) is better than the old Sampiganhalli

project. The former is not likely to cost more than the latter if properly carried out. Subject to the further elaboration of engineering details referred to in Col. Bowen's report of 12th December 1894, the Government resolve to adopt the Mavatur tank project.

2. The dry lands which will be converted into wet under the proposed tank are :—

	Acres.
Government, occupied...	1,368
Ditto unoccupied	712
Ditto unassessed	276
Total Government ...	2,356
Inam Polenhalli	28
Ditto Budimaranhalli	725
Total Inam ...	753
Grand Total ..	3,109

From information received from the Deputy Commissioner it appears that an acreage contribution of Rs. 20 will be forthcoming on the occupied Government lands. The Deputy Commissioner fears that the Inamdars may not at once wish to avail themselves of the irrigation to be created, but there seems to be every ground for believing that they will soon come forward to ask for the water, when once it is made available. If they do not, the right bank channel can be extended to supply irrigation to Government lands lower down. From enquiries which have been made the conditions of the tract proposed to be brought under irrigation indicate that extension of wet cultivation will be most useful for its general prosperity and that it will soon be as highly appreciated here as it is in the adjoining parts of the Kolar District. The tract is fairly populated and soil is reported to be rich.

3. By the public sale of the Government unoccupied and unassessed lands (988 acres) a sum of about Rs. 50,000 can be easily realized. The acreage contribution at Rs. 20 on occupied and Inam lands (2,121 acres) would eventually amount to Rs. 42,420. Thus Rs. 92,420 may be calculated upon as a set off against the cost of original construction which is estimated at Rs. 2,81,928, thus reducing the capital cost to Rs. 1,89,508. It seems that a further reduction is not improbable from reduction of rates as the result of a public competition by means of tenders to be invited.

4. The eventual revenue prospects of the work may be calculated as follows:—

	Rs.
On occupied and Inam lands (2,121 acres)	8,484
On unoccupied and unassessed Government lands (988 acres) ...	4,940
Total ...	13,424

being a little more than a return of 7 per cent. on the net capital outlay.

This work is therefore not only a remunerative one, but is situated in a part of the country where a large irrigation work is necessary as a protection against drought and the Government accordingly sanction the estimate for Rs. 2,81,928.

5. In a large tank of this kind, the reduction of the length of waste weir from 1,000 to 700 should be further fully investigated before actually resolved upon.

The following papers regarding the *Saligram Channel* Project :—

(1) Officiating Chief Engineer's Report, dated 2nd June 1894.

IMPROVING AND EXTENDING SALIGRAM CHANNEL.

I submit for orders the accompanying project for improving and extending the Saligram channel in Mysore District amounting to Rs. 3,56,633.

II.—*General scope of project.*—Briefly the proposals are :—

1. Head sluice at the left end of the new Allalkatte anikat to be designed with a view to eventually irrigating (1) all lands under the Saligram Rai channel, (2) Mirlé Hosa channel, and (3) the Mirlé Héré channel and Attikatte channels.

2. Widening and improving the Saligram Rai channel for 12¾ miles of its existing length to Ankanhalli tank to a width sufficient to irrigate all land under it as well as the Mirlé Hosa channel below.

3. Extension of the Saligram Rai channel to the proposed terminal tank at Hosa Agrahar, 11½ miles in length.

III.—*Duty of water assumed.*—*A duty of* 25 *acres per cubic foot* of discharge has been provided for the area under (1) the Rai channel and of 40 *acres per cubic foot* of discharge for all the land under (2) the Mirlé Hosa and other channels below; this, in my opinion, is quite sufficient to allow as the lower channels will have their supply considerably supplemented by the tail water from the cultivation under the channel above.

IV.—Taking the proposals in the order given in para II *ante*—

(1) *Head Sluice.*—This has been designed for a head of 3″ over anikat and is sufficiently large.

(2) *Widening and re-grading Rai channel.*—At present it is intended only to provide for sufficient discharge to irrigate all land commanded by the Rai channel and its extension, and also for the Mirlé Hosa channel next below it. The supply to the latter it is intended to let down through a sluice at 5¼ miles. If it is afterwards intended to irrigate all lands under the Mirlé Héré and Attikatte channels from the Saligram head works, it is only necessary to widen the channel still further from the head sluice for some 3¼ miles, the head sluice having been made big enough now to do this extra duty.

V.—*State of present channel.*—The channel at its commencement passes through very sandy soil, and I would propose an extra Rs. 10,000 being provided for rivetting the very loose parts of banks and for easing the slopes where found necessary, the slopes provided for are much too steep.

Up to 4½ miles of the old channel the original tortuous alignment has been followed, but it will be too expensive to alter it, while widening a few of the worst, sharp bends can be cut away. In a few places a good deal of rock will have to be removed. Executive Engineer says sufficient provision has been made in the estimate.

At 4¼ to 5 miles a diversion is proposed cutting off a long detour some ¾ mile in length. This cut is short, but will be very hard, and in parts in rock; but it is advisable, as the old channel passes through very rough country strewn with boulders, and there are constant leaks in channel all through this part, leading to great waste of water, the cut will be a great improvement in every way.

From 5¼ miles up to the end of the existing channel at 12¾ miles the old alignment has been followed.

VI.—*New extension.*—It is proposed to extend the channel for 11½ miles (24 miles in all) to the Hosa Agrahara tank. An outline of the proposed trace is given below.

At 1,800' from the start, the channel is taken through the Natanhalli saddle a branch channel of small dimensions being carried round the spur, two miles in length. The cutting through the saddle is only 17 feet deep at the deepest part, and is advisable.

Just before entering the Halé Mirlé tank at the second mile, an abrupt short spur is cut through (17' deep). This cut is quite unnecessary; the channel can be kept on a lower contour without trouble; the curves will be a little sharper, but not of any consequence.

At 3½ miles, the cutting is unavoidable owing to the Mirlé village being just below. From two to four miles the alignment can be considerably improved by keeping on a slightly higher contour so as to keep the channel in soil instead of in bank.

At the 4th mile a saddle is cut through to avoid a long detour. This cutting is 28' deep in centre, but is only 900 feet long altogether. The ground here is rocky, and, I doubt, if sufficient provision is made in the estimate for this cut, some rock may be avoided by turning the direction of line through the cut as shown in pencil on survey. I am not at all sure, however, that it would not be better to avoid this cutting, as it will only be ¾ mile longer to go round this spur.

A branch channel ¾ mile long of small dimensions is provided for round this spur.

From four to 6 miles the alignment should be a little higher throughout to keep the channel in soil, excepting where rocky. The small cutting at 5¼ miles can probably be avoided by judicious alignment.

At the 6th mile, the trace goes through the Bichanhalli saddle. A very nasty cut this will be through very rocky and hard soil. It should be seen whether the channel cannot with advantage be taken round four miles through a much lower saddle. Of course the road will have to be crossed twice, and this must be taken into account; but it will probably be found cheaper by a long way.

From 6 to 8¼ miles, the channel should be kept a little higher in soil.

At 8¼ miles, Purnaiya's cutting is entered and a branch channel eight miles in length has been provided for. This cutting being mostly completed already will not give us much trouble.

Beyond 8½ miles it would appear from the sections that insufficient fall has been allowed. For a small channel 5½' and 5' wide, as this is here, flowing 3' and 2½' deep only the fall of 0·25 per 1,000 or 1·32 feet per mile is insufficient, and we can afford to give the channel a fall of 0·41 per 1,000 or nearly 2·2 feet per mile. This would bring the F. S. L.* of the channel at 11½ miles to the same level as the crest of waste weir of the Hosa Agrahar tank, or 2,551·79.

VII. *General remarks.*—It will be seen that several alterations in the alignment are proposed; these can be investigated as the work is being carried out, and they will probably cause a considerable saving, but I think it safer to let the estimate stand as it is. As checked in this office it amounts to Rs. 3,56,633. To this should be added Rs. 10,000 for protective works in the first ¼ to ½ mile, bringing the total amount of the estimate to Rs. 3,66,633 or say Rs. 3,70,000. To this sum, I think, two per cent should be added for unforeseen expenses, which brings the cost of the project to Rs. 3,77,330, or in round figure Rs. 3,80,000.

The Deputy Commissioner in his No. 349, dated 8th March 1894, to the Executive Engineer, estimates the contributions from raiyats and Inamdars at Rs. 1,15,000. The sale proceeds of Government waste land, he estimates at Rs. 63,000 at Rs. 100 an acre, or a total of Rs. 1,83,000.

The net cost to Government of the project would therefore be Rs. 1,97,000. The increase in revenue is estimated by the Amildar at Rs. 30,000, which will represent a return of 16 per cent. There is a large provision in the budget for this work; but I could not authorize Mr. Karve to start work pending sanction, as

* Flowing 2½ feet deep.

the Amildar had not obtained mutchalikas in writing for the contributions, &c. verbally promised. I have little doubt, however, of their being obtained as the raiyats seem most eager for the work being undertaken. It would be advisable to start the deep cuttings as soon as possible. It will be seen that the project is highly remunerative, and I strongly recommend it for sanction.

(2) Dewan's note thereon, dated 23rd June 1894, conveying sanction to the original estimate for Rs. 3,66,663.

ESTIMATE FOR THE IMPROVEMENT AND EXTENSION OF THE SALIGRAM CHANNEL (LEFT BANK ALALKATTE ANIKAT) IN YEDATORE TALUK.

MR. MCLAUGHLIN had submitted a project for the improvement and extension of the Mirlé Hosa channel. But for reasons given in paras 6 to 9 of my memo, dated 15th August 1892, I concluded that an extension of the Saligram would in all probability be a better project, and directed its investigation.

2. The report and plans of this project submitted now by the Executive Engineer Mr. Karve are very imperfect, but the Chief Engineer's note explains the main features of the project.

3. I agree with the Chief Engineer's opinion that special protective works (costing some Rs. 10,000) are necessary in the first mile of the present channel.

4. The head sluice is calculated to give—

(*a*) one cubic foot per 25 acres of the 1,935 acres, under the present channel, and of the 5,883 acres under the extension ;

(*b*) one cubic foot per 40 acres of the 1,060 acres under Mirlé Hosa channel immediately below Saligram channel ; and

(*c*) one cubic foot per 40 acres of the 4,439 acres under the Mirlé Hiré Nala and Attikatte channels, both below the Mirlé Hosa channel.

The duty of water assumed in the above calculations appears liberal.

5. The widening of the present channel up to 5¼ mile provides only for the supply required for lands under Saligram (old and new) and under the Mirlé Hosa channel. For the further supply required for the Mirlé Hiré Nala and Alalkatte channels, a further widening of the first 5¼ miles of the Saligram will be necessary. This is not provided for in the present estimate, and is reserved for future consideration. If the immediate execution of this further widening is likely to cost less or to be better done than any future carrying out of the same work, it should at once be fully investigated, and an immediate decision arrived at whether it is at all required. I don't think there need be much difficulty in deciding this question now once for all.

6. The improvements proposed by the Chief Engineer in the present length of the Saligram are all very necessary, and arrangements must be made for due attention to them during execution. The proposed diversion between the 4¼th and 5th miles of present channel will, it is said, be very costly. The diversion saves a detour of ¾th mile in the existing channel length, but this saving is apparently not required to improve the grade of the channel up to its present end. It seems that there are leaks in the detour, but is there no means of stopping them other than the proposed expensive cut? What is the cost of the proposed cut? Cannot its width, and therefore its cost, be reduced by placing the division sluice for supply of Mirlé Hosa channel before this cutting is entered? These points require investigation and definite decision.

7. The alignment of the extension of the main channel for 11¼ miles is capable of considerable improvement as pointed out by the Chief Engineer. Every particular of this improvement should be definitely settled before any work is allowed to be done on the extension.

8. Fifteen miles of branch channels are proposed. These are not shown in the Section Book, nor has sufficient information been given of them elsewhere. The irrigable area commanded by each branch channel should be separately ascertained and compared with the length and cost of the proposed branch, and indirectly with the cost of any saddle cutting which makes the branch necessary.

The points requiring attention are—

1st—Natenhalli Branch.—Two miles. Is there sufficient land to justify it, and can any and what portion of this land be served by the tail end of the present Saligram proposed to be abandoned ?

2nd—Let the cutting before the 2nd mile be avoided.

3rd—The cutting at the 4th mile saves a short distance of $\frac{3}{4}$ mile, but makes necessary a branch of $\frac{3}{4}$ mile. Here alternative alignments and estimates will be useful.

4th—It should be examined and decided whether the small cutting at 5$\frac{1}{4}$ mile can be avoided as proposed.

5th—The Bichanhalli cutting.—If this is made lighter by adopting the lower saddle marked on the survey plan by Mr. McHutchin, the channel will be four miles longer. Here also alternative estimates will be useful ; also information about length and cost of branches round Bichanhalli high ground and irrigable area under them.

6th—Similar information for branches round Gundenhalli high ground should be obtained.

7th—Beyond Dewan Purnaiya's Gundenhalli cutting, the fall must be increased from 25 to 41 per 1,000, as proposed by the Chief Engineer.

9. Subject to full investigation and definite settlement of the foregoing points before actual execution of work, the estimate now submitted may be sanctioned. But a full report of the final project should be submitted in due course for any further orders considered necessary, with a map showing the proposed main and branch channels.

10. The work is a most popular one locally. The tract is healthy and well populated, and the demand for irrigated land is great. The market value of wet land is high, and the raiyats will very gladly pay a good acreage contribution on their dry lands to be converted into wet. But I have no information that definite contracts have been entered into with them or with Inamdars as regards the contribution they agree to pay and the wet assessment and water rate to be levied for the new irrigation to be supplied to them. It is obvious that these questions should all be definitely settled and recorded in writing before the work is commenced. The Executive Engineer calculates a contribution of Rs. 1,30,075 at Rs. 25 per acre of the 5,203 acres of Government land to be converted from dry into wet. He omits 680 acres of Inam land to be similarly converted. Why this omission ? Under clause 2 of para 3 of Government Proceedings, dated 1st October 1888, an Inamdar is liable like occupants of Government land to pay the contribution. If he refuses it, the remedy is to refuse him the water, and take it further and give it to the Government raiyats who are so anxious to get it. I cannot understand why the Deputy Commissioner in his No. 349, dated 8th March 1894, estimates the acreage contribution to amount to only Rs. 1,15,000. Under Ramasamudram Extension, the maximum rate levied was Rs. 30 per acre, and that was six or seven years ago when the market value of wet land was much lower. I do not wish to be hard upon the raiyats and Inamdars, but it is only equitable they should pay a reasonable price for the increased value imparted to their lands by the Government work proposed.

11. The foregoing remarks will be at once communicated to the Deputy Commissioner, with a request that he will obtain written mutchalikas from the Inamdars and occupants concerned, regarding acreage contribution and the payment of water rate or wet assessment as the case may be. The mutchalikas should be in printed forms, and be signed by all persons interested. In the case of Government villages, where particular individuals may be absent, the signatures of the others should generally be sufficient. The Deputy Commissioner will submit for information and approval the forms used in his District or now proposed to be used by him.

12. We may safely assume the acreage contribution to amount to Rs. 1,50,000. Some Rs. 75,000 may be expected by sale of the 680 acres of waste Government land. Thus there would be forthcoming 2$\frac{1}{4}$ lakhs. With the

improvement in engineering details above detailed, the cost of the work is not likely to exceed under any circumstances, say 3¾ lakhs. The net outlay, therefore, is likely to be only 1½ lakhs. The increased annual land revenue from this expenditure is Rs. 30,000, being 20 per cent on the capital outlay.

13. With the foregoing remarks, the estimate now submitted for Rs. 3,56,633+ Rs. 10,000 for protective works, total Rs. 3,66,633, may now be sanctioned, subject to such further orders, if any, as may hereafter be passed upon the report regarding engineering details above called for.

(3) Chief Engineer's report dated 16th March 1895, submitting a revised estimate for Rs. 4,28,422 for the same work.

With his Note of 2nd June 1894, Colonel McNeil Campbell submitted an estimate amounting in round numbers to Rs. 3,80,000 for improving and extending the Saligram Channel. The estimate was sanctioned by His Highness the late Maharaja, subject to further investigations and improvements suggested in Dewan's Note of 23rd idem.

2. This estimate, prepared by Mr. Karve, had not been worked out in sufficient detail and the improvements and developments suggested by the Dewan necessitated a revision of the whole. For this work, Mr. Mahadeva Sastri was deputed, with the assistance of Mr. Anandatirtha Rao who took the original levels, &c.

3. On 6th April 1894 Mr. Mahadeva Sastri submitted a revised project amounting to Rs. 6,17,846. This formidable amount put a different aspect on the advantages and remunerativeness of the scheme. The large excess, spread over many items, after careful criticism by Mr. McHutchin and myself, seemed much of it unavoidable, being chiefly due to the disproportionate quantity of rock and difficult soil which closer scrutiny showed, would be met in the excavations, and to the necessity of raising and strengthening the channel banks with stuff taken from long leads that had not been calculated on by Mr. Karve.

4. To reduce then this large demand, it became necessary to modify as far as possible the grades and sections of the channel, with due regard to safety and sufficiency of supply. With this view it was determined to reduce the depth of water from 6′ to 5′ in the first section, up to the deep cutting at 4¼ miles, to make the grade ·20 per 1,000 instead of ·25 and to increase the bottom width from 19 to 29 feet. At first sight it might appear that nothing could be gained by so reducing grade and depth of flow and entailing a considerable widening of the section, but it so happens that by reducing the grade and depth, we largely reduce the excavating and cutting of hard rock, by far the most expensive factor in the work, and can cut down the level of channel bank, the raising of which was so costly because of the stony and rocky stuff in the bed being unsuitable for bank work, and long leads for earth having to be resorted to.

5. Again, I saw no reason why the capacity of the channel should not be reduced to a duty of 30 acres per cubic foot of water per second for the irrigation below Saligram channel, its extension and branches, instead of 25 acres per cubic foot as originally allowed. 30 acres per cubic foot is now the provision on all our new channels and extensions, and is admitted to be liberal. These two changes in design and duty result in a saving of Rs. 40,000 on the first section, without, so far as I can foresee, diminishing effectiveness.

6. I had at first, also intended to still further reduce the channel section along the 1st reach that is, up to 3½ miles when the feeding sluice to Mirlé channel is to be fixed, by omitting altogether the water required by the Mirlé Hosa and Mirlé series. I saw no reason why these latter channels could not be supplied as hitherto from their own head sluice at Mirlé anikat, for the abolition or abandonment of which, there was no valid argument, in my mind. But on second thoughts, and because this further reduction in section would not leave sufficient stuff avail-

able for the sectioning of the channel bank, I allowed a provision at the rate of 60 acres per cubic foot for the Hosa Mirlé and Mirlé series, as a supplement to what can be drawn direct from the river head sluice.

7. The diversion cutting beginning at 3¼ miles is clearly a better expedient than enlarging and improving the tortuous channel round the contour through excessively stony and leaky soil. By reducing the grade up to this point as noted above, we come to a higher level for our channel bottom at entrance of cutting and were thus enabled to increase *its* slope and largely reduce its cross section through hard soil thereby effecting a material saving.

8. Continuing on this adjustment of grades and depths so as to minimise the cutting in rock and hard soil we have been enabled to reduce ultimately the revised estimate of Rs. 6,18,000 to Rs. 4,73,027, or as checked in this office Rs. *4,68,880, for which amount I now solicit sanction.

	Rs.
Note.—Estimate for Saligram channel and extension only ..	4,28,422
Add widening of the 1st 3¼ miles to 29 feet in width to feed Mirlé series as per estimate No. 3. (4) ..	40,458
Total ..	4,68,880

9. This still shows a considerable excess over the original estimate. Improvements in design of some of the minor items have caused slight excesses, but it is the expensive nature of the excavations which chiefly causes the increase. When the Mirlé channel extension was projected the proportion of rock, soft rock and gravel was, I thought, rather unusual, but on going round the trial pits on the trace with the late Mr. King, I accepted his estimated quantities. On this Saligram project the proportion is still worse, due probably to the higher alignment, but I see no reason to doubt the proportions arrived at by Mr. Mahadeva Sastri after close examination of the soils. In execution, the accurate measurement of the different stuffs to the satisfaction of Government and of contractors' claims, will require great care and accurate recording.

10. All the modifications of alignment, &c., suggested by the Dewan, in his criticism of the original plans, have been carefully gone into and adopted where feasible and economical. Some have not worked out well, and the original trace has then been adhered to. The project as it now stands may therefore be accepted as the best that can be devised.

(4). Dewan's Note dated 14th May 1895, calling for further information.

1. I have studied these papers very carefully, but regret that I cannot deal with them finally.

2. The work you have ordered to be done is all in the right direction, but it is not possible to sanction the revised estimate without further information.

3. I see that with my Memo dated 23rd June 1894, has not been printed His Highness' sanction to the original estimate of Rs. 3,66,633. I would like to see the original sanction.

4. I also want a comparative statement, showing the various items of (*a*) the original estimate as sanctioned by His Highness, (*b*) those of the estimate for Rs. 6,31,100 submitted by the Executive Engineer with his report of 5th October 1894 and (*c*) those of the one for Rs. 4,68,880 now submitted by you, with some explanation. I wish to see how these large differences arise, how much is due to quantities and how much to rates, &c. I want also to have a brief report regarding alignment and details of width, fall, &c., as now finally adopted noting the difference between these and those of the original project, sanctioned in June 1894.

5. Let me see the Map I had before me in June 1894, and the Section Books.

6. I also want some brief reply to the various points I raised in June 1894, showing how they have been finally settled. Also information about the Deputy

Commissioner's action and report regarding paras 10 *et. seq.* of my Memo of 23rd June 1894.

7. I can dispose of this project on the 18th or 20th at Mysore. I shall be at Mysore till 24th and then I come to Bangalore. As regards the eventual cost, it must depend upon rates we may be able to get from tenderers and upon quantities to be ascertained by actual measurement. The contract should provide and this in unequivocal terms.

(5) Chief Engineer's Note dated 28th May 1895, and its enclosures.—

With reference to your Note of 14th on the re-revised project submitted with my Memorandum of 16th March, I regret it was found impossible to re-submit to you the papers, with the further information required, by the dates mentioned. I now send them forward with the comparative statements asked for, which it is hoped will enable you to deal finally with the scheme.

2. On your Note of 23rd June 1894, you will observe the initials of His Highness, the late Maharaja, conveying sanction to the project, subject to the modifications suggested in your Memoranda.

3. The comparative statement marked A, exhibits in detail the differences between the 1st, 2nd and 3rd estimates, (*a*), (*b*) & (*c*). Mr. McHutchin's explanatory Memo, marked B, accompanying it, shows how the excesses in quantities arose and how the savings in cost of the main items were effected.

4. The Map and Sections books mentioned in para 5 of your note now under reply are submitted herewith.

5. The various points noticed by you in your note of 23rd June and referred to in your para 6 are fully dealt with in the marginal red ink notes of Assistant Chief Engineer, now put up, and marked (C), made on his original order of 10th July 1894 to Mr. Anandatirtha Rao, Executive Engineer's report on his estimate, (*b*) for Rs. 6,17,846, also explained how these points had been disposed of.

6. The question of contracts with both raiyats and Inamdars to regulate exactly the contributions and rates of assessment, has not yet been settled by the Deputy Commissioner. Until it is settled definitely, work will not be started.

	Rs.
Executive Engineer assumed that 5,203 acres dry land would be converted into wet, at Rs. 30 an acre ...	=1,56,090
and 680 acres unoccupied at Rs. 100 ..	= 68,000
Total	2,24,090
as the amount of contribution to be levied. The revenue to be derived from the extension is put down at Rs. 6 an acre. On 5,883 acres (as above) ..	=35,298

This represents a return on the final estimate of over 17 per cent.

7. In para VI of his Note of 2nd June 1894, Colonel McNeil Campbell reported fully on the alignment, which was described by Mr. Karve in his report on Original Estimate (*a*) copy of which is annexed hereto for ready reference marked R.

The discharge statement, marked D, gives the falls, widths, depths, &c., of the channel as projected in estimates (*a*) & (*b*). Those of the final estimate (*c*), are given in discharge statement marked D. To allow of ready comparison between the original falls, &c., provided and those modified for the final estimate, I have, below the figures for these items in the latter discharge statement, entered in red ink the figures of the first discharge statement.

(B)

Explanatory Memo for important items referred to in statement attached.—

(3). *Excavation.*—The differences between estimates (*a*) & (*b*) were all explained in my office Note dated 1st December 1894.

Estimates (*a*) & (*b*).—The excess in quantity is due to provision having been made in estimate (*b*) for lands under the whole Mirlé series in first 3¼ miles of channel; estimate (*a*) provided only for the Mirlé Hosa channel in addition to the Saligram series proper.

Excess in quantity 36,405 cubic yards.
Excess in cost Rs. 1,14,692.

The large excess of Rs. 1,14,692 in cost is due to the classification of soils; a large quantity of soft and hard rock being allowed for in estimate (*b*).

Estimates (*b*) & (*c*).—The saving in quantity is due to the depth of flow having been reduced from 6' to 5' in the first 4¼ miles, and to the grade (or fall) having been reduced from 0·25 to 0·20 per 1,000. This widening of the channel considerably reduced the quantity of hard rock in bed. The duty of water was also increased from 25 acres to 30 acres per cubic foot of discharge for the Saligram channel and its extension.

Saving in quantity 1,02,008 cubic yards.
Saving in cost Rs. 90,569.

We were also enabled to reduce the cutting in the 5th mile owing to our being able to increase the fall through it.

The saving in cost is due to the same causes.

Embankment Estimates (*a*) & (*b*).—Of the excess in quantity some 42,600 cubic yards is only earth obtained from cuttings for which 6 pies per cubic yard has been allowed in estimate (*b*) for lead; the balance of 1,89,958 cubic yards was stated by Executive Engineer to be due to sufficient provision not having been made in estimate (*a*) for raising of the bank; there was little or no earth available from the cuttings from 4½ to 12¾ miles of the old channel, what little excavation there was, being in hard and soft rock which could not be utilized.

Excess in quantity 2,32,558 cubic yards.
Excess in cost Rs. 40,657.

The excess in cost is due to similar reasons, with the addition that rates were increased from 0-2-6 to 0-3-0 per cubic yard throughout to allow for lead.

Estimates (*b*) & (*c*).—These savings were effected by reducing the depth of flow from 6' to 5' on first 4¼ miles; and by increasing the duty of water as explained under excavation. The widening of our channel also provided more earth for the required bank. The discharge statement was also taken out for shorter lengths of channel, and the reductions in width obtained by the more detailed statement, effected large savings on this head between 4¼ and 12¾ miles of the old channel.

Saving in quantity 2,22,588 cubic yards.
Saving in cost Rs. 36,934.

Revetment Estimates (*a*) & (*b*).—The embankments to the channel would naturally require revetting especially on the old channel improvements from 4½ to 12¾ miles. Insufficient provision was made in estimate (*a*).

Excess in quantity 13,687 cubic yards.
Excess in cost Rs. 17,965.

Estimates (*b*) & (*c*).—The saving was effected by reducing the depth of flow as explained under embankment and the Rs. 10,000 allowed under "Protective Works" is sufficient, it is believed, to cover probable requirements on the whole channel; especially as so much stone will be available from rock blasting.

Savings-the whole.

Branch Channel Estimates (*a*) & (*b*).—The excesses on these branch channels were explained by the Executive Engineer (Mr. Mahadeva Sastri) to be due to the original estimates not having been got up in detail, quantities, &c., only having been taken out roughly per mile of channel.

Excesses Rs. 44,141.

Estimates (*b*) & (*c*).—Savings were effected by the discharge statements having been more carefully revised, and the duty of water increased from 25 to 30 acres per cubic foot of discharge.

Savings Rs. 21,677.

(C)

Points to be investigated further as instructed by Dewan in his Note on Original Project (vide Printed paper dated 23rd June 1894.)	*Assistant Secretary's remarks.*	*Dewan's orders.*
1. Will the widening of the channel at some future date for the supply to the Mirlé series (first 3½ miles) cost more than widening the channel at once?	Cheaper to do the widening at once, as otherwise there will be insufficient earth for the bank on the lower side from the excavations.	Do it now.
2. Further investigation of the proposed deviation through the deep cutting between 4¼ and 5th mile of old channel; and can the leakage in present alignment be stopped and cutting thus avoided?	It has been estimated that the cutting will only cost Rs. 2,139 more than the alternative circuitous route, owing to the large quantity of embankment required. The bad nature of the ground with its numerous boulders, broken ground, &c., would be difficult to deal with.	
2. (*a*) What is the cost of the proposed cut, and can its width be reduced by placing the division sluice for the supply of the Mirlé series before the cutting is reached?	The width of the cut has been reduced, and the diversion sluice put in before entering the cutting. The old tortuous channel will be improved as a branch channel only.	Approved.
3. Improvement of the alignment on the proposed extension is capable of considerable improvement as pointed out by the Chief Engineer; every particular of this improvement to be definitely settled before any work is allowed to be done on the extension.	These improvements have all been considered in detail.	
4. Fifteen miles of branch channels are proposed; and these have not been properly surveyed and sectioned, nor irrigable area commanded by each, separately ascertained and compared with the cost of cutting through the saddles which necessitate these branches?	The branch channels have now been all actually surveyed and levelled, and detailed estimates made.	Approved.
(1.) *Natanhalli branch.*—Is there sufficient land to justify it; and could not a portion of the land commanded by it be irrigated by the extension of present Saligram channel?	This branch channel is only estimated to cost Rs. 500. The old Saligram channel being utilized as far as it now extends to Shadhal village. The total length of this channel is 2 miles.	
(2.) Cutting near 2nd mile to be avoided.	This cutting has been avoided now.	
(3.) Cutting at 4th mile saves ¼ mile, but makes a branch ¾ mile necessary: alternative alignments and estimates are required.	The cutting 3¼ miles-the cutting is unavoidable owing to the Mirlé village. But the cutting at Mirlé saddle at mile 4 has been now abandoned. The extra length of ¾ mile round the spur having been estimated to cost nearly **Rs. 10,000** less than the deep cutting	
(4.) Cutting at 5¼ miles can be avoided as proposed.	It has been found cheaper to have a cutting here (as soil is soft) than to go round.	
(5.) It may be possible to avoid the big cutting at *Bichanhalli saddle*, by adopting the lower saddle marked by Mr. McHutchin. Here alternative estimates should be worked out?	The cutting has been adhered to. The lower spur being only 3' lower, and the additional length of channel required 1¼ miles. It has been found better to adhere to the cutting than to contour round this long spur over 4 miles, and thus lose 5¼ feet of head, in addition the deepening of the Gundanhalli cut will be necessary.	

Points to be investigated further as instructed by Dewan in his Note on Original Project (vide Printed paper dated 23rd June 1894.)	*Assistant Secretary's remarks.*	*Dewan's orders.*
(6.) Similar alternatives to be worked out for the Gundanhalli spur.	The Gundanhalli cutting now requires very little work done to it, therefore branch channels are of course much cheaper.	
(7.) The fall to be increased beyond the Gundanhalli cutting as proposed by the Chief Engineer.	The fall beyond Gundanhalli cutting has now been increased to 2' a mile. The cody level of the Hosa Agrahar Tank not admitting of a greater fall.	

No. 2690-1—316-7, DATED, BANGALORE, 12TH JUNE 1895.

ORDER THEREON.—The Government have given its best consideration to this important project in the revised form in which it is now submitted. The original estimate was sanctioned for Rs. 3,66,663, and the revised estimate now submitted is for Rs. 4,28,422, or an excess of Rs. 61,759. This large excess is owing to the revision rendered necessary by a closer examination of the ground and the resulting revised estimates of probable quantities classification, &c., In fact it has been possible to keep down the excess to the above figure, only by enhancing the duty of water and altering dimensions and grades of the channel.

2. The project commends itself to the Government as satisfactory in every way, and the altered details now proposed to be adopted as regards duty of water, grades and sections of channel and the other points referred to in enclosure C to the Chief Engineer's report dated 28th May 1895, are approved.

3. The principal items under which the Revised Estimate under consideration differ from the original estimate are :—

		Quantity.	Cost.	Excess of cost.
1. Excavation of Channel—	Original	4,03,845	1,91,012	24,123
	Revised	3,38,242	2,15,135	
2. Embankment—	Original	80,842	14,055	3,823
	Revised... ...	90,812	17,878	
3. Branch Channels—	Original... ...	...	26,440	19,464
	Revised... ...	...	45,904	
4. Sluices—	Original... ...	...	16,882	3,649
	Revised... ..	...	20,531	
5. Waste-Weirs and Silt dams—	Original... ...	...	14,633	12,379
	Revised... ...	...	27,012	
6. Inspection Lodge—	Original... ...	...	1,800	3,322
	Revised... ...	...	5,122	

These excesses are shown to be unavoidable by the details so far as they have been worked out. *Per contra* the item of Rs. 7,957 for revetment in the original estimate is omitted in the revised estimate, as the lump sum provision of Rs. 10,000 for protection works is considered sufficient both for revetment and protection works.

4. Under such circumstances the Government are pleased to sanction the revised estimate for Rs. 4,28,422. The actual eventual cost of the work will however depend upon the rates obtained by means of public tenders now being called for and upon the quantities hereafter to be ascertained by actual measure-

ment. Provision for payment according to quantity and classification actually ascertained, will be duly made in any contracts the Chief Engineer may enter into, for execution of the work.

5. The Deputy Commissioner has not yet submitted the information called for in paras 10 *et. seq.* of the Dewan's Note dated 23rd June 1894, regarding the amount realizable by acreage contributions on occupied lands and by the sale of unoccupied Government lands. This delay has the effect of retarding the commencement of this most important work and he will be called upon to submit the information forthwith together with an explanation of the delay that has occurred.

Secretary to the Govt. of Mysore, P. W. D.

RAILWAYS.

Proceedings of the Government of Mysore,

READ :—

Railway Secretary's Notes dated 4th December 1894, submitting Railway Budget Estimates for the year 1894-95 for sanction.

No. 721—2 R. DATED, BANGALORE, 20TH JUNE 1895.

ORDER THEREON.—

I—CONSTRUCTION.

1. ***Bangalore-Hindupur Railway.***—The estimate (exclusive of Locomotive and Rolling and other Stock and Direction) amounts to Rs. 25,01,160, and the expenditure to end of last official year, Rs. 24,35,309. A sum of Rs. 27,000 is provided in the Budget for current official year for making sundry payments and for winding up of the accounts. This is sanctioned. Considerable credits are due on capital account which will be augmented by gradual sale of suspense stores.

2. ***Kolar Gold Fields Railway.***—The amount of estimate (exclusive of Locomotive and Rolling Stock) is Rs. 5,33,157, and the expenditure to end of last official year Rs. 6,37,204. The Budget for current year provides Rs. 50,000 for expenditure, partly by the State for completing sundry items of work and partly by the Madras Railway Company after handing over the line to them for working. This is sanctioned. The excess of Rs. 1,44,047 over the original estimate is accounted for as due to the loss in exchange and to certain unforeseen works not provided in the original estimate. Orders on revised estimate submitted for the work have been passed separately.

3. ***Mysore-Nanjangud Railway.***—During the year the Southern Maharatta Railway Company refunded to the State Rs. 17,759 being the unspent balance of estimate for Rs. 7,03,273. Hence the expenditure to the date of refund stands at Rs. 6,00,795. Certain capital works costing Rs. 43,000 are proposed to be undertaken in connection with this line. The provision made in the Budget for the current official year to that extent is sanctioned.

4. The grants under construction will stand as below :—

	Rs.
Bangalore-Hindupur Railway	27,000
Kolar Gold Fields Railway	50,000
Mysore-Nanjangud Railway	43,000
Total Rs. ...	1,20,000

II—SURVEYS.

1. ***Birur-Shimoga Railway.***—The expenditure to end of 1893-94 has been Rs. 15,853 against an estimate of Rs. 17,100 sanctioned for location in 1884-85. The Budget for current year provides 1,200 for final closing of the accounts and the same is sanctioned.

2. ***Reconnoitering West Coast Railway Alternatives.***—There has been an expenditure of Rs, 13,654 against the sanctioned estimate of Rs. 20,745, of which 10,346 is the proportionate share debitable to the Madras Government. A provision of Rs. 7,100 is made in the Budget for current official year, made up of Rs. 4,171 repayable to the Madras Government being the unspent balance of their share of the estimate and Rs. 2,929 for expenditure by the State to complete the reconnaissances and close up the accounts. The same is sanctioned.

3. ***Arsikere Hassan Location Survey.***—The amount of estimate sanctioned and provided for in last year's Budget is Rs. 15,000, and the expenditure Rs. 16,788 to end of 1893-94. The Budget for current year again provides Rs. 8,800 for expenditure. The total excess over estimate of Rs. 10,478 is explained as due to under-estimation of the time and staff required for field operations. The Budget provision of Rs. 8,800 is therefore sanctioned. Orders on revised estimate amounting to Rs. 23,638 have been issued separately. Credits aggregating Rs. 955 are due to this account.

4. The grants under Surveys will be as below :—

	Rs.
Birur-Shimoga Railway	1,200
Reconnoitering West Coast Railway alternatives	7,100
Arsikere-Hassan Railway Location Survey	8,800
Total Rs. ...	17,100

III—Other Items.

1. ***State Carriages.***—The amount of the original estimate is Rs. 50,400, and expenditure to end of last official year Rs. 60,610. The excess over estimate is explained as due to modifications in design and loss in exchange. The amount of Rs. 8,000 entered in the current year's Budget to meet the actual requirements of a revised estimate is now under preparation. Orders on revised estimate will be passed separately.

2. ***Collection of Sleepers.***—The original estimate sanctioned by the Darbar on the 15th of December 1893 amounts to Rs, 2,03,000, and the expenditure to end of 1893-94, Rs. 1,21,149. The provision of Rs. 82,000 made under current year is sanctioned.

3. The total grants under other items stand as below :—

		Rs.
i	State carriages	8,000
ii	Sleepers	82,000
	Total Rs. ...	90,000

IV—General Charges.

The provision of Rs. 26,400 made under Direction and Accounts and Audit is also sanctioned.

2. With the foregoing remarks the Railway Budget Estimate for the year 1894-95 for Rs. 2,60,000 made up as below is sanctioned :—

		Rs.
i	Construction	1,20,000
ii	Surveys	17,000
iii	Other items	90,000
	General charges	26,400
	Total Rs. ...	2,53,500 or 2,60,000 in round numbers.

3. Copy of Budget with accompaniments is attached.

By Order,
C. BOWEN, Col.,
Secy. for Railways to Govt. of Mysore.

EXCISE.

TABULAR STATEMENT OF MATTERS OF ROUTINE FOR JUNE 1895

Serial No.	Proceedings.			Subject and Order.
	No.	Date.	To whom sent.	
1	22580 R. 3283	10	Excise Comr.	Requesting that the Provincial Abkari Demand, Collection and Balance statements for the month of April 1895, may be submitted at an early date with explanation for delay.
2	22973 R. F. 45-92	11	Ditto ...	Stating that the claim of vend farmers and separate shop keepers to compensation due for the non-supply of liquor from Bonded Depôts, which was mixed up with ganja, has yet to be adjusted, before the full amount for "wastage" under arrack can be admitted.
3	23096 R. 3364	11	Ditto ...	Forwarding for full report with the connected papers, petition dated 29th May 1895 from Captain William Maitland Anderson, claiming to have right to open a Niliguri beer tavern at the Kolar Gold fields.
4	23099 R. 3368	11	Ditto ...	Enquiring how the Deputy Commissioners of Districts manage now for furniture for the use of the Excise Establishment of their Districts and what articles of furniture have now been given them.
5	23135-7 R. 3383	11	Dy. Comr., Mysore, Comptr., Excise Comr.	Sanctioning a bill for Re. 1 being the amount spent by the Amildar of Hunsur Taluk out of Excise deposit amount for process fee for prosecuting certain persons for offences under the Excise Act
6	23146 R. 3374	11	Excise Comr.	Drawing the Excise Commissioner's attention to para 4 of Government Proceedings No. 19222-3—R. F. 117-93, dated 4th May 1894, calling for fresh proposals in view to ensure better results in the detection of illicit distillation, as the same could not be successfully carried on under the arrangement sanctioned in the above order, and observing that the results reported in the Excise Commissioner's letter No. 1143—115, dated 6th September 1894 seem to indicate that there is practically very little detection now
7	23122 R. 3369	12	Ditto ...	Stating that, under the circumstances reported, the complaint of Anandur Ramanna, Toddy vend Farmer, Arkalgud Taluk, during the year 1892-93, seems frivolous, and his advocate may be informed accordingly; and enquiring whether the arrears due by Ramanna have since been adjusted.

Serial No.	Proceedings. No.	Date.	To whom sent.	Subject and Order.
8	23322-3 R. 3405	15	Excise Comr., D'Costa, Tempry. Detective Asst. Supr.	Stating that though D'Costa appears to have done some good work and was promoted twice, his conduct has not been satisfactory, that his present appointment on Rs. 40 + 15 is by far higher than his substantive appointment of Tester on Rs. 15 + 10, and that therefore his case cannot be considered to be a very hard one, and requesting the Excise Commissioner to view D'Costa's case favorably on an opportunity occurring hereafter, if he does good work as Daroga.
9	23340-1 R. 3406	15	Excise Comr. ...	Sanctioning as a special case a bill for Rs. 25-4 being the batta due to the General Assistant Supervisor, Mysore District, for expeditious journey made by him within the District during the month of April 1895.
10	23344 R. F. 70-94	15	Ditto ...	Stating that it is very inexpedient to reclassify towards the close of the year certain Ganja shops proposed to be brought under second class in the town of Mysore; that number, localities, and rates should be determined under the rules and local circumstances considered before the shops are given out in future; and that, if the cases under reference are really hard and require redress, the Deputy Commissioner may recommend some remission, if the fees remain unrealized after the end of the year.
11	24054 R. 3475	18	Ditto ...	Requesting the D. P. W. Secretary to send a project for diverting the Sewage of the Distillery tanks and to suggest plans for additional feeding channels to increase the water-supply of the Kempambudhi Tank.
12	24085 R. 3492	18	Ditto ...	Making certain observations with reference to the statements showing the Talukwar particulars of the results of the sales of Toddy Vend Farms in the Kolar District for the years 1892-93, 1893-94 and 1894-95.
13	24188 R. 3515	19	Ditto ...	Returning the Vernacular papers relating to Murigappa defaulting Toddy Vend Farmer of the Chitaldrug Taluk.
14	24624 R. 3622	25	Ditto ...	Issuing instructions in regard to the submission to the Dewan's Office, of the Depôtwar Registers of daily issues of liquor from the Central Distillery in Bangalore.
15	24651 R. F. 57-93	25	Ditto ...	Returning for reference and re-submission, the batta bill of Ananta Rao, Toddy Daroga, Mysore District, on account of a special trip to Mandya undertaken by him under the Deputy Commissioner's orders, and enquiring why the Mysore District Daroga was sent beyond his jurisdiction and why the French Rocks Daroga was not ordered to do the work.

Serial No.	Proceedings. No.	Date.	To whom sent.	Subject and Order.
16	24652 R.F. 3-92	25	Dy. Comr. Mysore	Forwarding for a complete report petition from Hotte Rangannah and R. C. Muddappa as also a copy of this office note on the subject of arrears of Toddy Revenue due to the Jahaghirdar of Yellandur and other minor Inamdars by the firm of R. C. Muddappa, & Co., Toddy Contractors, Mysore District, and requesting an explanation in respect of a certain amount still remaining unadjusted.
17	24906 R. F. 100-92	26	First Asst. Resdt.	Acknowledging the receipt of Rs. 4-4-0, being the balance of Rs. 10 advanced by the Darbar on account of copies of certain judgments required from the Anantapur District.
18	25019 R. 3712	27	Ex. Comr. ..	Observing that the sales of the country beer taverns in the Bangalore City for 1895-96 appear very low, and requesting the Excise Commissioner to expedite the statistics called for in this office No. 19451—R. 2793, dated 8th April last, and to submit six printed copies of each set of the sale notices and licenses published.

OFFICE OF THE DEWAN OF MYSORE,
Bangalore, 30*th June* 1895.

2	22123 R.F.120 93	1	Dy. Comr., Mysore.	Forwarding five copies of the Forest Manual by C. Lakshman Rao of the Inspector General of Forests' office, with a request that the cost thereof, *viz.* Rs. 15, may be remitted to Lakshman Rao.
3	22231-2 R. 3220	1	Inspr.Gen., Forests, and Comptr.	Sanctioning the purchase of two tables and four chairs at a cost of Rs. 50 for the use of the two Rangers attached to the Bangalore District.
4	22234 R. 3222	1	Inspr.Gen., Forests.	Stating that the information required regarding sandal propagation, &c., may be embodied by the District Forest officers in their reports to the Inspector General of Forests, who should deal with the subject in his Administration Report.
5	22235 R. 3223	1	Dy.Comr, Shimoga.	Forwarding for disposal a petition, Registered No. 3130, dated 20th May 1895, from one Naga Jois, son of Nanjunda Jois, residing at Sagar, complaining that the Deputy Commissioner had refused to grant him (a landholder) timber on favorable rates for building a house on the ground that such concessions are not granted to raiyats residing in Kasaba towns.
6	22236 R.F. 7294	1	Inspr.Gen., Forests.	Stating that the draft notification submitted by the Inspector General of Forests, containing the revised list of roads whereby timber and other forest products may be imported into Mysore, has been approved by the Government and sent to the Compiler, Mysore Gazette, for publication; and requesting the Inspector General of Forests to submit definite proposals as to which of the Forest Rules and notifications of 1872 and 1873 should be cancelled on account of the Rules of 1878.
7	22233 R. 3221	1	Ditto ...	Declining, for reasons stated, to sanction the grant of an allowance of Rs 50 to the Storekeeper of the Plantation Department for extra work performed by him in connection with the supply of fuel to the Central Jail.

Serial No.	Proceedings. No.	Date.	To whom sent.	Subject and Order.
8	D. H. O. 122-24	6	Dy. Comr., Mysore, Treasury Dept., Comptr., Supt. of Kheddas thro' Inspr. Gen. of Forests.	Authorizing the Deputy Commissioner to pay the Khedda Superintendent the sum of Rs. 5,000 sanctioned in Government Proceedings No. 21798-9—R. 3146, dated 30th May 1895, to be placed at the Khedda Superintendent's disposal for repairs and other preliminary works in connection with the Chamrajnagar and Kakankoté Kheddas.
9	22484 R. 3266	7	Inspr.Gen.,Forests.	Recording Inspector General of Forests' letter submitting the journal of occupation of Mr. K. Shamaiengar, Khedda Superintendent, for the fortnight ending 30th April 1895, and returning the latter.
10	22485 R. 3267	7	Ditto ..	Forwarding, as requested, six copies of Government Proceedings No. 16368-9—R. 2302, dated 21st March 1895, passing orders in regard to the removal of *Mugali* and *Bili Jala* trees from Amrut Mahal Kavals assigned to the Public Cattle Department.
11	22486 R. 3268	7	Ditto ...	Forwarding a copy of letter No. 22486—R. 3268, dated 1st June 1895 from the Comptroller to the Government of Mysore, with a request that certain working charges bills of the Forest Department therein called for may be furnished to the Comptroller as early as possible.
12	22566 R. 3278	8	Ditto ...	Recording Inspector General of Forests' letter submitting the journal of occupation of the Khedda Superintendent Mr. K. Shamaiengar for the fortnight ending 15th May 1895.
13	22567 R. 3279	8	Ditto ..	Sanctioning the free grant of ten cart-loads of jungle wood and two hundred bamboos valued at Rs. 60 to one Eranna of Talagaddy village, Sorab Taluk, to enable him to reconstruct his house destroyed by an accidental fire.
14	22568 R. 3280	8	Ditto ..	Enquiring how the charges incurred from time to time for planting trees in the compound of certain Government buildings in the Kolar Gold Fields are to be recouped.
